SUMMARY ANALYSIS

REMOTE VIEWING (RV) SESSION DC-53

SG1C

1. (S/NOFORN) This report documents a remote viewing session conducted in compliance with a request for information concerning a suspected event of 15 Dec 80 [REDACTED]
2. (S/NOFORN) The remote viewer's impressions of the target are provided as raw intelligence data, and, as such, have not been subjected to any intermediate analysis, evaluation or collation. Interpretation and use of the information is the responsibility of the requestor.
3. (S/NOFORN) The protocol used for this session is detailed in the document Grill Flame Protocol, AMSAA Applied Remote Viewing Protocol (S), undated.
4. (S/NOFORN) Following is a transcript of the viewer's impressions during the remote viewing session. At TAB A are drawings made by the remote viewer reference his impressions of the target site. At TAB B is target cuing information provided the remote viewer. At TAB C are Control Monitor comments.

TRANSCRIPT

REMOTE VIEWING (RV) SESSION DC-53

TIME

#66: This will be a remote viewing session for 1300 hours, 19 December 1980.

Relax and concentrate now. Relax and concentrate. Relax. Relax. Relax. Focus your attentions solely and completely on the target, solely and completely on the target:

 SG1A

Solely and completely on the target. Solely and completely on the target. Move now through time and space, move your perceptions now through time and space to the target area 15 December, 15 December 0930 GMT, 15 December 0930 GMT.

#01: A very bright light, it's flickering...a strobe light.... ship..... On a coastline on a city...we're in a city.. I keep coming down on this...kind of a strobe light. I can't tell if it's like, uh, like one of those, uh, flashing lights on top of a police car or it it's on a...some other kind of vehicle... Some type of emergency vehicle or something...

#66: Okay. Now from the target, from the target, do you see a coastline from the target or do you feel the coastline is at this city?

#01: I think the, uh, coastline is away from the city... I, uh, came down originally on the coast and moved to the city.

#66: All right. Let me read the coordinates again and let's make sure we maintain a fixed position at the coordinate.

SG1A 

+07 A time window 15 December 1980. Now scan from 0930 to 10:00, 0930 to 10:00...

#01: I feel like I'm...at a very great altitude and I'm looking at this coastline...and off shore from the coastline is like a group of five or six ships. And I get this like, uh, very quick, very bright flash, it's very intense initially, and then it gets softer in intensity and then it goes out...a very powerful strobe...

~~SECRET~~

~~SECRET~~

#66: What makes you say that you're at a great altitude?

#01: I feel like I'm looking at the earth from a great altitude. I see this coastline and a...specks in the water look like ships. Everything's shimmering with light, like in the bright sunlight... clouds... I don't know why I went to that altitude, I just went to the altitude for some reason. Below me I see this very intense light flash and then it kinda dies out, like a slow burning flashbulb....

I'm getting like a, uh, just a "V" shape of water, very high, but a "V" shape of water.

#66: All right. From your perspective, from your perspective, what altitude are you at at your perspective?

#01: Very high, 15, 20 miles.

#66: The light that you perceive you call a strobe. At what altitude above the earth is this?

#01: Uh...2,000 feet.

#66: Tell me what it is you experience that makes you say 2,000 feet.

#01: Like cast...doesn't cast any shadow out, there's no shadow, just this brilliant light, and there would be shadow, it would seem, if it was in the earth's surface it would be some shadow. But there's none, it's like suspended in the air.

#66: It- do I understand you to say that it is of sufficient altitude that it doesn't cast long shadows on the objects below it?

#01: That's correct...

+11 #66: Go to the point in time before the flash and the strobe illuminates things and describe to me what you see....

#01: See what looks like a, uh, small aircraft, like a fighter aircraft, larger than a fighter, though, like a, like a night, uh, like a night bomber or something like that. It's wings are swept back. It's very powerful, it's got jets, twin jets, and it's, uh, flying southward along this coast. This coast runs, uh, runs like from the southwest to the northeast. Seems he's flying like to the southwest along this coast.

#66: All right, let's freeze in time, freeze in time, all things stop in time. Now move into the aircraft and describe to me what you find...

#01: Find a...find a.....it's like a very complicated instrument package with a...it's like fastened to this plane and...there's a pilot and a, two pilots sitting like back to back. I see this box, very large box, it's got the instrumentation at...

~~SECRET~~

~~SECRET~~

- #01: Saw some kind of a...some kind of a sophisticated weapon. I'm not sure if it's a guidance type device or...
- #66: What is it you experience that makes you say sophisticated weapon?
- #01: It's- I get a test feeling, uh, experimental feeling about it. And it's got a funny shape to it, like it's, uh, like it's meant to be dragged or dropped or guided. There's a lot of electronics packed around it and in it. It's very sophisticated. But it's also explosive, I think.
- #66: And what is it you experience that makes you say explosive?
- #01: It's a...I get a strong weapon feeling but it's, the business part of this weapon is very small, so it would have to be something very powerful.
- #66: All right, we are now frozen in time. Move to the pilots and describe them to me....
- #01: They're both Caucasian, they're both wearing, uh, flight suits that are heavily camouflaged. The, uh, insignia they're wearing looks very British, same kind of insignia as the British wear, but I don't, it's not exactly the same, it doesn't have the same kind of tabbing under it.
- #66: Not being familiar with the British insignia describe to me what is it exactly you see?
- #01: Stripes with, uh, it's like four...four rows of stripes with like buttons, triangulated buttons on top. They're worn on the epaulets...these camouflaged flight suits. It's not a solid color tab under the triangulated buttons...silver and black, stripes are silver and black. I see, uh, both pilots have mustache, both pilots are also armed, wearing like side arms shoulder holsters...speaking English...clipped, clipped English, they also speak with a British accent but they're not British...  
  
They're boots are wrap around, they're wearing boots that wrap around and buckle.  
  
I get a marking on the plane looks like, uh...uh, like a flower, like sections of flowers with, it's a very modern type marking, like, uh, a flower or two flowers with stems radiating forward.
- #66: All right. Now tell me as you watch these pilots here, how do they feel about what they're doing right now? How do they, what's their emotional content right now?
- #01: Uh, they're in a, they're in a test mode, it's, uh, they're like professional test pilots. They feel like there's some risk to what they're doing, uh, but I don't get a risk of life

~~SECRET~~

~~SECRET~~

#01: feeling, I get a...I don't know how to explain it, risk of doing it, but not risk of life. Has something to do with the, oh, the initiation point of this weapon...how or when it's initiated.

#66: All right, let us walk now through time very carefully, remembering you are only an observer, walking now very carefully through time, and watch what happens in the next few minutes. Very slowly and very carefully, remembering you are only an observer. Time now moves forward.

+21 #01: I got the, uh, rear pilot's doing some kind of a checklist. He's calling numbers or switches and main pilot is checking switches. This is being relayed to a ground, uh, a ground station. Ground station's relaying instructions. They're, uh, initiating some form of an auto pilot, or pre-conditioned or pre-programmed flight pattern...initiating a series of...of arming type switches. And then there's a bright flash. I don't have the plane any more..... I think the plane's destroyed... .. That's all I get.

#66: All right. I'd like to go back and revalidate the imagery you've reported. I want you to go back in time now to your previous imagery when you were talking with the pilots and watching them. Tell me when you've arrived.

#01: Okay.

#66: All right. Now at this time I want you to take up a different perspective. Move back into the area where you saw some electronics and sophisticated gadgetry.

#01: Okay.

#66: Now at this different position let's move forward through time again in a different perspective and see if we can see what happens. All right, now time moves forward.

+23 #01: Okay... I just feel different...different portions of this electronics element getting...getting turned on, becoming active. I get a auto mechanical shift or snapping type effect. I hear some kind of lock bolts, like slide bolts slamming. More electronics. I get, uh, very, very intense explosion. Just a very white intense explosion...felt like some form of chemical explosion.

#66: Describe your experience to me.

#01: Like, uh...like a very, very volatile fuel being consumed very rapidly...

#66: Okay. Now let's focus solely, solely right now on the point of flash. And take a look again so that you might describe it, the altitude of the point of flash.....

~~SECRET~~

~~SECRET~~

- #01: Uh, no...no higher than 3,000 feet. The plane was going into a climb though. Just broken into a climb, it's like the pilot just, just kicked it back.
- #66: Okay, and what is it, what is the experience you have that makes you say 3,000 feet?
- #01: I'm looking from the, uh, point where the pilot kicks it back and it just feels like about 3,000 feet.
- #66: Okay. Let me guide you through an experience now. Focus your attention on the time window in which you were observing the pilots and their checklist. There they are again. Now turn and look at the pilot's instruments. Now find the altimeter, now we are approaching the flash again. Seconds before the flash read the altimeter to me...
- #01: It's very high. I get 10,000 now, 10,000 in the altimeter but it doesn't seem right.
- #66: All right, fine.
- #01: I just see a 1 and a bunch of zeros.
- #66: All right, fine.....
- #01: I'm not sure that's an altimeter, either.
- #66: That's fine, just relax, and I want you now to move outside the aircraft. I want you to move away and outside the aircraft, further away and further away now.
- #01: Okay.
- #66: Now it's important for me to know if something is, if this explosion occurs and the aircraft disappears as your imagery now indicates, or in fact is a weapon device dropped from the airplane?
- #01: No, the whole vehicle is vaporized.
- #66: All right.
- #01: It's completely destroyed.
- #66: Examine your concepts and your feelings then about the situation. Do you have a nuclear feeling about this situation?.....
- #01: I think it was, uh....I think it was nuclear, but it wasn't a nuclear detonation.
- #66: Explain the experience that you have that makes you say these words.

~~SECRET~~

~~SECRET~~

- #01: I don't, uh, I don't get a feeling of that magnitude. It seems like that if it was nuclear it would be a lot larger magnitude.
- #66: Am I correct in assuming that you have a nuclear feeling, but-
- #01: Yes, but I don't interpret it as a nuclear explosion.
- #66: And the reason you say that is because of the size of the explosion?
- #01: Correct.
- #66: All right, fine. I have no further questions concerning this particular event. I would like to provide you, however, to explore any area that you might think important, and report when you wish....
- +31
- #01: I don't have anything to add that I haven't said.
- #66: All right, fine. Focus your attention then back on me in the present time, here in the room. Move your arms, move your legs, take a few deep breaths and prepare to draw the imagery that you have just perceived.
- #01: Okay, uh, page one is kind of a very general outline of this, uh, aircraft. And it was larger than a standard size fighter, you know. And I had this, this really overweight guppy type feeling, you know, like it had two really huge engines, one on each side, that were built right into a very large delta wing type configuration. You know, like a guppy type feeling, you know, it wasn't your standard, you know, light combat efficient type fighter, for some reason. It was a modern enough fighter, but very blunt nosed...you know, heavy aircraft.

And, uh, up under the belly is where this package was hanging. And it was molded into the body of the craft. You know, like when it was affixed to the aircraft it looked like part of it's skin, you know, the way it was fixed there.

Uh, page 2 is a drawing of the package itself. And, uh, this entire thing fit to the base of the plane. The thing that I labeled package I feel like was the explosive portion of the, the weapon system. And then in the front up here was all the electronics. And I felt like when this thing is detached from the aircraft the electronics go with it, you know, like it might be some smart electronics or something. And then there was some, uh, like auto mechanical devices in the back. And there's some, some flat, flat section back here and I don't know what it was, but it was like an appearance of flat shiny metal.

And then, uh, page 3 is just, uh, the way I saw it happen was, uh, the coastline and these, these black ovals were ships. And this aircraft was flying in the direction of the arrow, and, uh, just vaporized. I wanna see your, uh, type pfft!

~~SECRET~~

~~SECRET~~

#01: Uh, page 4, the left hand thing which was like two cloth, dark cloth strips over two silver strips all side by side was worn up on the shoulder boards, like shoulder boards. And they had these 3 buttons like on them, one on each shoulder. That was, uh, what was on the uniform. And then the, uh, marking on the plane looked like, uh, like this. This isn't exactly correct, but gestaltically this is what it appeared to me as. It looked like two incomplete flowers with stems going forward into like a pointed or projectile point. And, uh, something like that. And it was red. It mighta been just a little bit of white in it...but it wasn't much, it was mostly red. Mighta been outlined in real fine white stripes, but it was mostly red. And that's essentially it. I can't draw the electronics after they were vaporized. What can I say?

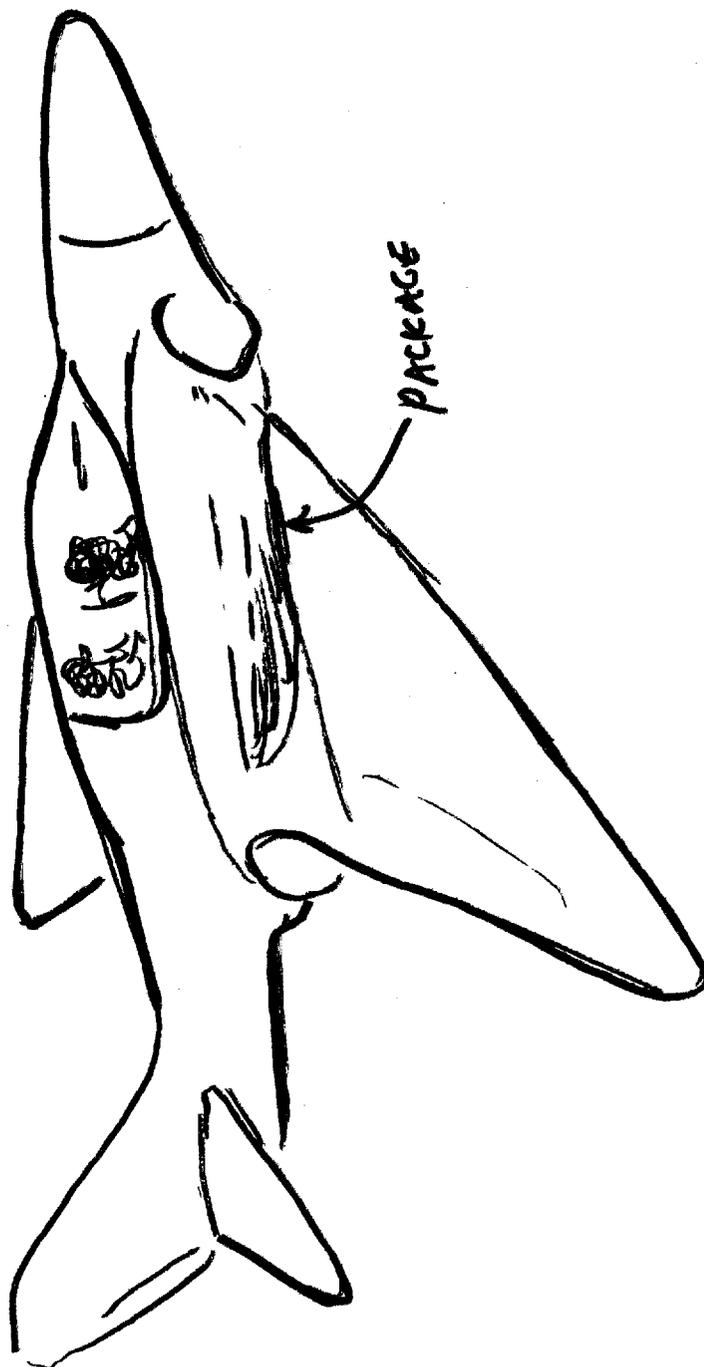

#66: Okay, anything else you wanna add? Your feeling about the session?

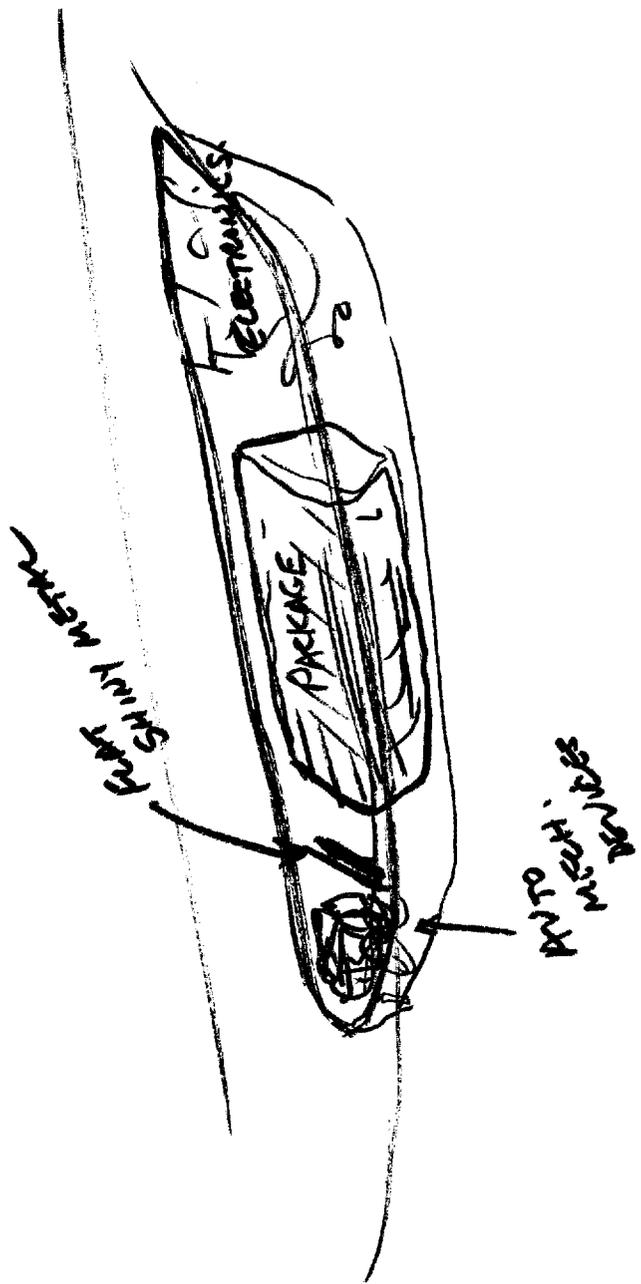

#01: No, uh, that's all I get.

#66: Okay, fine.

TARGET CUING INFORMATION

REMOTE VIEWING (RV) SESSION DC-53

1. (S/NOFORN) Prior to the session the viewer was told that he would be provided geographic coordinates and that he would be working on a past time window.
2. (S/NOFORN) At the beginning of the session the viewer was provided the following information:

SG1A

[REDACTED]

150930 Dec 80 GMT

3. (S/NOFORN) During the session the viewer was asked to scan the time period 0930 to 1000 hours GMT at the target. During the session the viewer was asked to elaborate on his perceptions by the interviewer as directed by the control monitor.

CONTROL MONITOR SUMMARY

REMOTE VIEWING (RV) SESSION DC-53

1. (S/NOFORN) This session was conducted at the special request of the AF. Data and questions to be utilized during the sessions were transmitted via the secure DACOM system and only the control monitor (CM) had access to the material. *(see attached)*

2. (S/NOFORN) Prior to the session, the CM briefed the interviewer and provided him with the following information.

a. This was a new project - 8041.

SG1A

c. Interviewer was to have remote viewer focus on coordinates given and move him back in time to 15 Dec 80, [REDACTED]

SG1C

3. (S/NOFORN) During the session, the CM gave the following instructions to the interviewer:

a. Have him (RVer) go down and examine flash and determine what it is.

b. What altitude did the flash occur at?

c. Have him go to point in time when strobe light first appears and explain what causes it.

d. How high was this explosion?

SG1B

22 December 1980

TO: [REDACTED]

SUBJECT: Summary of Report DC-53, Source #01

1. (S/NOFORN) The following information was provided by source #01 and was given to this office on 19 Dec 80 at 1300 hours:

SG1A

a. (S/NOFORN) Source reported information concerning location at [REDACTED] and during time frame 15 Dec 80 at 0930-1000 hrs GMT.

b. (S/NOFORN) Reported very bright light, flickering, like a strobe light.

c. (S/NOFORN) Reported 5/6 ships in the area. Coastline somewhere in vicinity, not sure of relationship.

d. (S/NOFORN) Reported small aircraft - larger than a fighter, like a night bomber, with wings swept back. Plane had 2 pilots and large box with instrumentation package; some kind of sophisticated weapon; test feeling. Reported strong weapon, small but powerful.

e. (S/NOFORN) Reported pilots to be Caucasian, wearing camouflaged flight suits with insignia that was British-like but not exactly the same. Plane had markings like two flowers with stems.

f. (S/NOFORN) Source reported that individuals were professional test pilots and that they were checking switches and feeding data to ground station when explosion occurred. Plane was destroyed!

g. (S/NOFORN) Explosion was very white, like chemical-volatile fuel being consumed very quickly. This explosion occurred somewhere between 3-10 thousand feet.

h. (S/NOFORN) Source reported that he felt nuclear material involved, but no detonation occurred.

2. (S/NOFORN) Complete report will be forwarded to your office ASAP. Request evaluation of this data be forwarded to this office NLT 15 Jan 81.

3. (U) Included are 4 drawings made by the source pertaining to the above location.

4 Incl  
As stated
