SUMMARY ANALYSIS

REMOTE VIEWING SESSION DCC-98

1. (S/NOFORN) This report documents a remote viewing session conducted in compliance with a request for information.
2. (S/NOFORN) The remote viewer's impressions of the target are provided as raw intelligence data, and as such, have not been subjected to any intermediate analysis, evaluation or collation. Interpretation and use of the information provided is the responsibility of the requestor.
3. (S/NOFORN) The protocol used for this session is detailed in the document Grill Flame Protocol, AMSAA Applied Remote Viewing Protocol (S), undated.
4. (S/NOFORN) Following is a transcript of the viewer's impressions during the remote viewing session. At TAB A are drawings made by the remote viewer reference his impressions of the target site. At TAB B is target cuing information provided the remote viewer.

TRANSCRIPT

REMOTE VIEWING SESSION DCC-98

TIME

#14: This will be a remote viewing session for 27 July 1981; mission time is 1100 hours.

1100

All right #01, the time is now 1100 hours. Your mission for today is to go to the following geographic coordinate, and describe the area. The coordinate is:

SG1A

I want you now to project your awareness to that location and describe the area.....

+01

#01: Layout of.....overall area is...some buildings...small airport....parking lots... It's like a...small city..... Very good mixture of buildings and open area, or area with grass or trees..... Got old buildings and new buildings..... Just a minute. I'm kinda looking for something significant...

+04

Got some..some form of construction going on. Uh, topographical it's slight city area with the constructions, bordered by a...coastline, looks like..... That's all I'm getting. I don't see anything else very significant....

+05

#14: Okay. Tell me more about the construction.

+06

#01: Looks like a..an extension or add-on section to a large building. There's a...a big square building on a concrete platform like. And then there's one side that's dead away. Very extensive like, uh, one section's dug out in a "L" shape. And there's like a very deep hole to one side of the "L" shape. Get an impression that part of it's covered over..a tunnel of sorts... This is like coming out of the side of the base of a...base of this foundation area, this large block type structure..out of this concrete foundation.

#14: Okay. I'd like you to move back in time, back in time to June 1978. And again the coordinate is:

SG1A

The date is June 1978.

PAUSE

~~SECRET~~

+07 #01: All I'm getting is a...a section of beach road. All this
construction is, now it's not there.. Just a large section
+10 of beach road. Some white buildings... Looks like mounds
of some white....

I don't get anything there now. It's just brown.

#14: How would you describe the activity at this location?

+11 #01: Barren. I don't get any activity there at all hardly...
Just minimal traffic on this road and that's all....
It's not even..five or ten percent of the activity now.
That'll come later...

#14: I'd like you to drift up over this area and tell me more about
the greater surrounding geography...

+12 #01: Okay. Get a...get a larger city to the west northwest..
Light hills and..green to the south.. Does get more rugged
the further south you go. Some surrounding fireland. But
two is the minimal though. Coastline runs parallel to the
+15 roads from west northwest to east southeast.. To the east
southeast there's another city but it's very small, closer,
much closer than the large city... There's a mountain range
to the, uh, south southeast, some distance away. That's all
I get.....

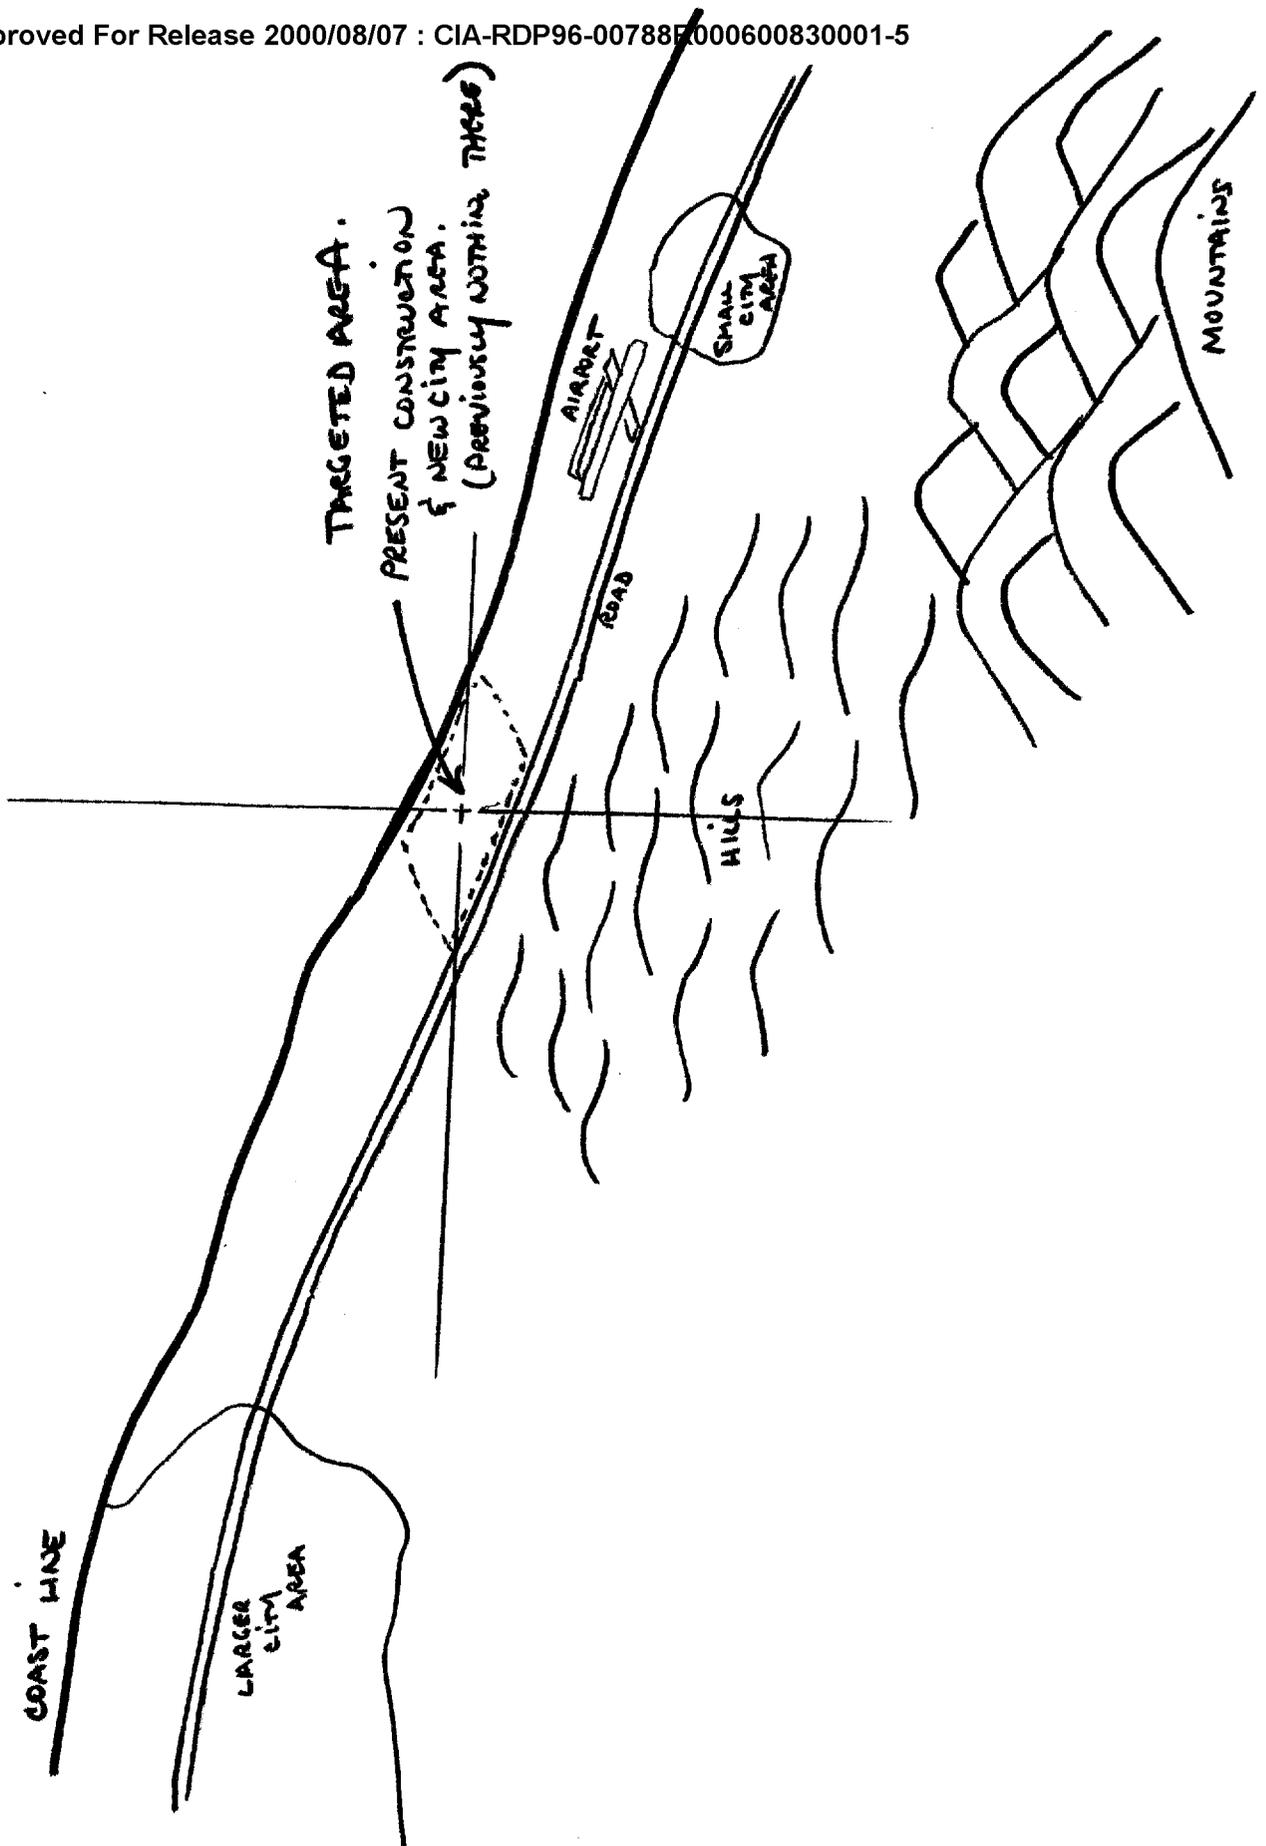

#14: Okay #01, I have no further questions at this time. I'd like
you now to bring your attention, your awareness, and your
focus back to this room.....

#01: Okay, on the page that I have given you I drew the coastline,
the smaller city area with the airport, the road runnin'
parallel to the coast, the larger city area. The cross there
indicates the target area, which is now presently construction
in a new city area. Previously there was nothin' there.
South of that's hills. Southeast of that is mountains. And
there's minimal farming in the area. That's essentially it.

#14: Sounds good to me.

TARGET CUING INFORMATION

REMOTE VIEWING SESSION DCC-98

1. (S/NOFORN) The remote viewer was given no targeting information prior to the start of this session.
2. (S/NOFORN) During the session the viewer was asked to focus on a geographic coordinate and describe the area. He was then asked to describe the same area on June 1978.
