

SECRET**DRAFT**Classified Statement of Work: Psychoenergetics --
Threat to US and Potential Applications (FY84)

1.0 General (U)

(S/NOFORN) During FY 83, remote viewing received the greatest attention and it was shown to be an excellent method for obtaining information on a distant site. It has excellent potential for gathering intelligence on sites that are denied to more conventional collection techniques. In FY84, experiments will confirm or deny its infusion into the US intelligence gathering apparatus. The emphasis for FY 84 will be on both improving its reliability and demonstrating its trainability. A major effort will also be expended on expanding its scope from using coordinates to target the remote viewer to a system where a variety of targeting methods can be used. In addition to the existing and developing training program, new methods and approaches to training will be examined. New methods of evaluating results from remote viewing will be sought.

(S/NOFORN) The psychokinesis (PK) area will receive considerable attention in FY 84. The emphasis will be on those areas that may be adapted to countermeasures. Both preventive and detecting methods are to be examined.

WORKING PAPER

SECRET

NOT RELEASABLE TO FOREIGN NATIONALS

This document is made available through the declassification efforts
and research of John Greenewald, Jr., creator of:

The Black Vault

The Black Vault is the largest online Freedom of Information Act (FOIA)
document clearinghouse in the world. The research efforts here are
responsible for the declassification of hundreds of thousands of pages
released by the U.S. Government & Military.

SECRET

2.0 Specific Tasks (FY 84) (U)

2.1 (S) Research and develop the final stages of remote viewing.

2.1.1 Expand remote viewing ability to include both configural and analytical capability.

2.1.2 Demonstrate its trainability in the latter stages.

2.1.3 Perform quarterly experiments that show training improves remote viewing performance.

2.1.3 Demonstrate an accuracy of at least 70% in the remote viewing derived data.

SECRET

SECRET

2.2 (S) Examine and test at least one new approach to the existing training regime now under development at SRI.

2.2.1 An approach that uses both another form of targeting and that is conceptually different than the existing program should be examined.

2.2.1 Results of the new training system will be demonstrated each quarter and its final product will be compared to other training approaches.

SECRET

SECRET

2.3 (S/NOFORN) Targeting viewers with methods other than coordinates will be explored.

2.3.1 Beacon and a wide variety of abstract targeting will be investigated.

2.3.2 The success of each method and the conditions under which it showed the greatest success is needed.

SECRET

NOT RELEASABLE TO FOREIGN NATIONALS

2.4 Psychokinesis (PK) should be examined and evaluated.

2.4.1 The foreign work in PK should be examined and, where possible, an attempt to duplicate it should be made.

2.4.2 The PK influence on sensitive instrumentation whose quantum states may be the main interaction mechanism will be investigated.

2.4.3 Determine what systems are most susceptible to PK influence.

2.4.4 Quantify magnitude of PK effects.

2.5 Data from remote viewing sessions will be coded into the existing data base management system.

2.6 The remote viewing evaluation technique developed in FY 83 will be further refined.

2.7 Operational remote viewings will be performed on an as needed basis.

2.7.1 New data will be evaluated as it is produced.

2.7.2 Alternate systems for evaluation will be followed.

2.8 Travel for contract administration by the COTR will be paid with contract funds.

2.9 Training and research on enhancing the quality of remote viewing data will be continued.

Milestone Chart: Psychoenergetics -- Threat to US and Potential Applications
