This document is made available through the declassification efforts  
and research of John Greenewald, Jr., creator of:

# The Black Vault

The Black Vault is the largest online Freedom of Information Act (FOIA)  
document clearinghouse in the world. The research efforts here are  
responsible for the declassification of hundreds of thousands of pages  
released by the U.S. Government & Military.

8601/2e

Source #21 - Described site in an area of rolling terrain with water in the vicinity; hot, humid, muggy climate. A circular structure was present. Feelings of 'dense', 'thick' and 'confining.'

Source #101 - Described site in flat, rolling land. Water nearby. Climate was warm, thick and moist. 'Manmade' land in a series pattern. A structure is located on the site. Corridors within the structure pass by box-like, antiseptic, grouped rooms.

Source #03 - Described a tall, large structure. Noticeable (unpleasant) chemical smells and tastes; also industrial smells in the area. One building at the site has numerous levels, at least one of which is filled with small cubicles divided by a central corridor. Activities here involve controlled/restricted access, segregation, observing, organizing and development. There seems to be people in the cubicles; they may have originally been here for another purpose, but are being used because they are conveniently there (NFI).
