1. (S/NF/SK) Tasking: See original tasking data sheet, attached. Since source searched only the first half of the required time line during his last session (09Dec86), the primary task for this session was a source search of the remainder of the time line.

2. (S/NF/SK) Session: Source was allowed to review his last session (sans procedure report). When source recalled site, the revised tasking was then explained to him. Monitor requested that source place the following on his worksheet, in descending order on the page: 1) site coordinates, 2) a time line inclusive of the years 1981 - 1988, and 3) a Stage 6 matrix. Source was then instructed to search for/perceive anything significant on the line.

3. (S/NF/SK) Summary: Source perceived a cavernous area with a curved, rounded, propped up ceiling. Within, he describes a separate area which does not seem to fit in with its surroundings. There is some (U/I) activity associated with this area. The site evinces a high level of activity during the early part of 1987, tapering off about one-third into the year, then experiencing a sharp, quick drop about three-quarters of the way into 1988.

4. (S/NF/SK) Feedback: None provided source.
