PROJECT SUN STREAK (U)

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

Session Procedures Report (S/NF/SK)

| | |
|---------------------------|------------------------|
| PROJECT NUMBER: 8711 | SESSION NUMBER: 3 |
| DATE OF SESSION: 4 AUG 87 | TARGET COUNTRY: IRAN |
| REFERENCE: | MISSION STATUS: |
| TECHNIQUE UTILIZED: CRV | SOURCE IDENTIFIER: 018 |

(S/NF/SK) Monitor Tasking: Using encrypted coordinates (provided), determine the [redacted] during the following windows: August, September, October, November and December 1987.

SG1A

2. (S/NF/SK) Source Tasking:

- coordinates read (243200/283668) and ideogram produced
- source was then directed to draw a time line and label it with the windows indicated above
- source then searched the time line for significant information

3. (S/NF/SK) Summary: Source summary is attached; nothing substantive contained.

4. (S/NF/SK) Comments: Planned approach to the next session includes prebriefing the Source on the intelligence question prior to readdressing the time line.

memorandum

DATE: 4 August, 1987

REPLY TO
ATTN OF: DT-S

SUBJECT: SESSION SUMMARY, PROJECT ⁸⁷¹¹~~8710~~ (C-SS)

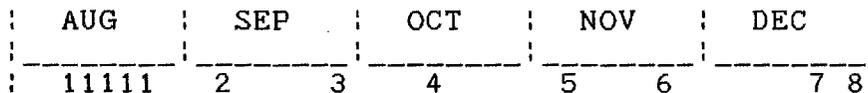

SG1J TO: DT-S (ATTN: [REDACTED])

1. (S-SS) Statistics:

| | |
|---------------|-----------------|
| Project #: | 8711 |
| Viewer: | 8799 |
| Session date: | 018 |
| | 04 AUG 87 |

2. (S-SS) Impressions gained from the session include:

a. A time-line for the next 5 months (August thru December, 1987, showed 8 noticeable points of interest. They are:

- 1) Point #1 spans about a two week period. It starts with a sudden event (NFI), then has a deepening "sliding" feeling through about the next to last week, at which time the depth of the event returns to normal, fairly rapidly.
- 2) Point #2 is a sudden event. It begins with an impression of a deep "thunk" sound (AOL: as though something large runs into something) There is also an accompanying high pitched sound (AOL: like sonar beeps).
- 3) Point #3 is also a sudden event. It carries with it impressions of a sudden stoppage, with resulting shock and surprise on the part of people in general. Lots of impressions of people gossiping and talking about it.
- 4) Point #4 is perceived more as a marker on the time line than an event. It carries a strong impression of being totally unnoticed. It is perceived as a thin, black "ring" through which the time-line travels. Those on the time-line pass through the middle of it without even taking notice of it. It is located almost exactly in the middle of October.
- 5) Point #5 is located well into the first week of November. It carries strong perceptions of being very repulsive (to me). It seems to have a physical component which looks like a small blob of gangrenous

material; sticky and slimy. For other people (EI column), it has both the repulsion of seeing it, with the attraction of curiosity. Impressions in the I column are of "sanity, safety, revision, and a warning".

- 6) Point #6 spans a short period of time (possibly a week). It conveys a sense of extreme nervousness, energy and activity. It seems to have a "scary" component.
- 7) Point #7 is another sudden event, but it seems to carry a mildness. It gives more the impression of the shock of sudden awareness than the shock of an actual event.
- 8) Point #8 is perceived as a black blockage, an ending place. It also seems to have a physical component, as though it is an actual thing placed there for the purpose of blockage. It has a metallic feeling to it.

2. Viewer's critique: All through this session, I was aware of a definite lack of physical characteristics to the impressions I was getting. It was as though my viewing of the target had little or nothing to do with actual physical objects. From the beginning, there was an awareness of an "allegorical" feeling. It is possible that, having been tasked with viewing the target's progression through time, I was viewing the progression more than the target, itself. I don't know.

*During the progression, the impression is unclear -
- time, one must to emphasize -
access to target & measurement -
the sensation? of time travel.*
