PROJECT SUN STREAK (U)

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

Session Procedures Report (S/NF/SK)

PROJECT NUMBER: 8711	SESSION NUMBER: 5
DATE OF SESSION: 5 AUG 87	TARGET COUNTRY: IRAN
REFERENCE:	MISSION STATUS:
TECHNIQUE UTILIZED: ERV	SOURCE IDENTIFIER: 079

1. (S/NF/SK) Interviewer Tasking: Using encrypted coordinates

November and December 1987.

2. (S/NF/SK) Source Tasking: Source was prebriefed that the same target as during the previous session would be worked and that "We will  I will not give you coordinates again, but only time periods."

3. (S/NF/SK) Summary: Source's summary is attached. (Note: Source neglected to address the month of December 87 in the summary. During the session and debrief, December was described as being very much like November in that no missile firings would occur.

4. (S/NF/SK) Comments: Per debrief, when Source talks of the system rotating and spinning faster, this is associated with a higher degree of "watchfulness". Note that the launcher site is opposite or near what seems to be an island.

[This interviewer is getting the impression that the September firing will be against a calibration target ("a platform, locked up at night"). Also, that the confusing activity surrounding the October time frame may represent the chaos surrounding a preemptive attack (possibly in the form of an anti-radiation missile, or ARM) vs. the higher "degree of watchfulness" of the, now calibrated, system].

~~SOME TIME~~ FRAME: I COULD SEE A SHOOTING UP OR A FIRING UP INTO THE SKY. I COULD FEEL A HEAVY DENSE ENERGY IN THE SKY. I FELT THAT THE TARGET WAS NEAR THE WATER OR ON THE WATER. I COULD SEE A BIG ROUND SAND MOUND SITTING ON THE WATER AND THE FIRING GOING NEAR IT. I REALLY DO NOT KNOW WHAT THE TARGET WAS. EVEN THOUGH I WAS NEAR WATER I CAN NOT SAY THAT THE TARGET WAS A SHIP ALTHOUGH I FELT THAT THE TARGET COULD BE SOME TYPE OF COMMUNICATIONS SYSTEM. I COULD ALSO SEE THE BUILDING OF SOME TYPE OF PLATFORM. I COULD SEE SOMETHING LANDING IN THE WATER. IT WAS BIG AND HEAVY AND MEN WERE DIGGING OR MINING IN THE WATER. I COULD SEE MEN SWIMMING. I FELT THAT THERE WOULD HARDLY BE ANY DAMAGE IF ANY AT ALL. I FELT THAT NO PEOPLE WOULD BE HURT. I ALSO FELT THAT AFTER THE FIRING THE MEN WOULD BE MORE SECURITY CONSCIOUS.

~~OCT TIME~~ FRAME: I COULD SEE RIGHT AWAY THAT THE SYSTEM WOULD BE PROGRAMMED DIFFERENTLY. IT WOULD BE MOVING FASTER, ROTATING FASTER, AND SPINNING FASTER. IT WOULD BE CONNECTED. I DID NOT FEEL THAT THE SYSTEM WOULD BE FIRING AGAIN.

~~NOV TIME~~ FRAME: I FELT THAT I WAS BACK ON THE LAND. THE SYSTEM WAS NEAR BIG TREES AND THE MAN IN CHARGE WAS POSITIONING THE SYSTEM IN A HALF CIRCLE OR OPENED CIRCLE. I COULD SEE A ROLLING UP AND SETTING UP OF THE SYSTEM. I SENSED TWO POINTS AS TO WHERE THE SYSTEM WOULD BE OPERATING. I DO NOT KNOW IF THE SYSTEM WILL BE FIRED AGAIN BUT I GOT THE STRONG FEELING THAT SOMETHING WAS WRONG HERE. ~~SOMETHING~~ BAD WAS GOING ON AND I DO NOT KNOW IF THIS WAS RELATED TO THE FIRING OF THE SYSTEM OR IF IT HAD TO DO WITH SOMETHING ELSE.

2
[Handwritten notes]

missile, in line

Sept I felt there would
be a shooting up I
could get a heavy
close enemy in the sky.
I felt the target was a communication
water or near the water
system
I could see a building of
a platform I could see
something heavy landing
deep in water I could
see men swimming coming up
from the water into a small
ship. I felt that there
would be hardly any damage
if any at all. People not
hurt but after the shooting
there would be more
security measures taken.

Oct - Change in the system.
Programmed differently.
The system would be
moving faster, rotating
faster, spinning faster.

Now Back in the perched in
and
position would be man in charge
a half circle, near trees
opened walls.
Something looked bad.
Outside is pick
talking down, getting up.
ATTN
Two points
near people
will hurt

✓ miss dir. at system near water?

yes

✓ look at system again

its controlled by men, / boxes, sits out, monitor dials.
locked up, shut down at night, on water

✓ what happens after missile does the job

stems people close up

✓ what

drooping, hang not much

✓ not much

will draw away, protection, prevent

✓ missile - damage?

I don't do

- Oct 1987 -

- missile firing?

programmed differently, moving faster, rotate, the
system will be logical, programmed differently, will sit
in a watchful, will sit in watchful

no big even

be careful of the; back to, ^{will be} men in water climbing up

Nov 1987 bring something for water,

Went back

✓ what do men want to do

work early, entering up for water

- Nov 1987

wait

ooh ooh something looks bad - the outside sick sick
something bad the worst

✓ describe

they'll be a roll down & setting up new position/location
outside, will make awful awful - man in charge will
move everything in a half circle - will be used - hurts hurts

✓ used

system outside in a location with the trees, outside arm
2 points across from each other - will smell bad
will be over will be near people a will hurt

✓ what will hurt

will be forced in - will have work to themselves.

2 large vans - very large vans - rounded on tops
setting up near a county line - near a division.
regular people will see them won't know what they doing
- handling of devos -

these will not be as concealed - more open - will be reloaded
with it

✓ used?

don't know yet.

~~NO~~ NO

✓ Dec 87

✓ marsh field

I know

the force the same as NOV.

✓ come back now -

Somehow something

PREBRIEF: "SAME PROJECT - WE WILL BE LOOKING AT

SG1A

[REDACTED] I WILL NOT GIVE YOU COORDINATES AGAIN, BUT ONLY TIME PERIODS, ~~IT WILL~~

SANCTUARY:

TIME: 1014

✓

~~SILKWORM MARCHING~~ - SEPT 1987

✓

SEPT 1987 - SILKWORMS

There's firing... shoots steady up energy - makes energy expand and move - red energy - blasting - movement - circular - men behind each other marching walk - some acty men in place

✓

look at fire

up will be noisy - vibratory - energy will expand go out heavy energy - will feel it

✓

effects

in the air

✓

will shoot

where

-

up just up - making a - in process of making a platform a catch something trying to protect but will just go it up then up travel across / the height it goes down slower - will be guided when to land orbit a path, in line

✓

Target?

wide large over near water, near water - no people

✓

what is it supposed to hit

give me time

✓

reps circles the area is round, not a structure over the water, in the water, not land.

✓

want to hit just water

held on a mound

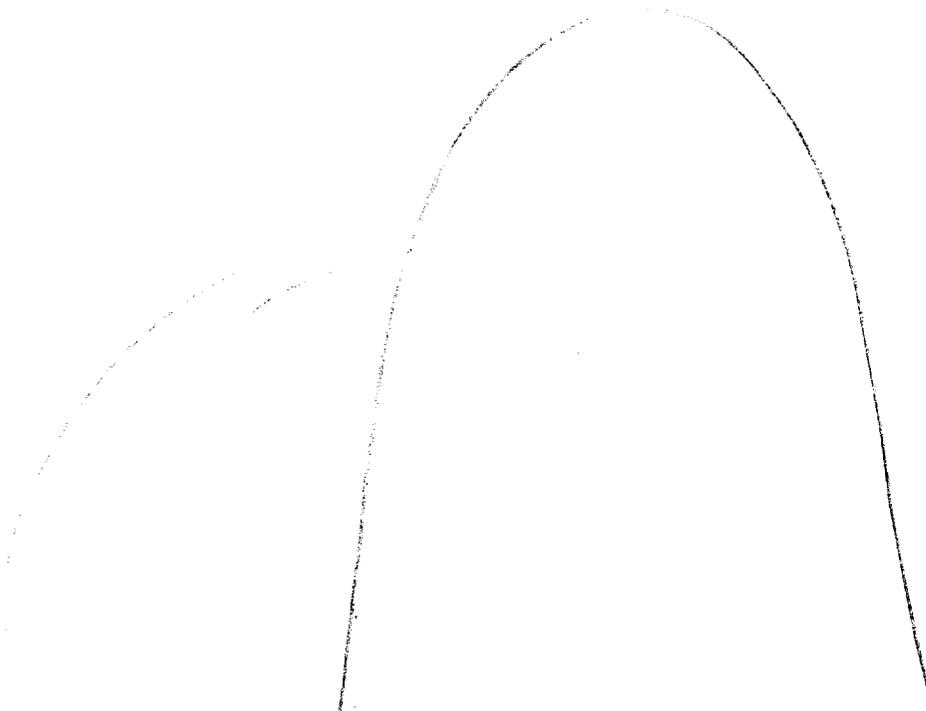

✓

yes, I believe so - mining, mining landing deep in water, a heavy gross, something heavy in water not even people are target. There's a hull in the water something natural steady up for water.

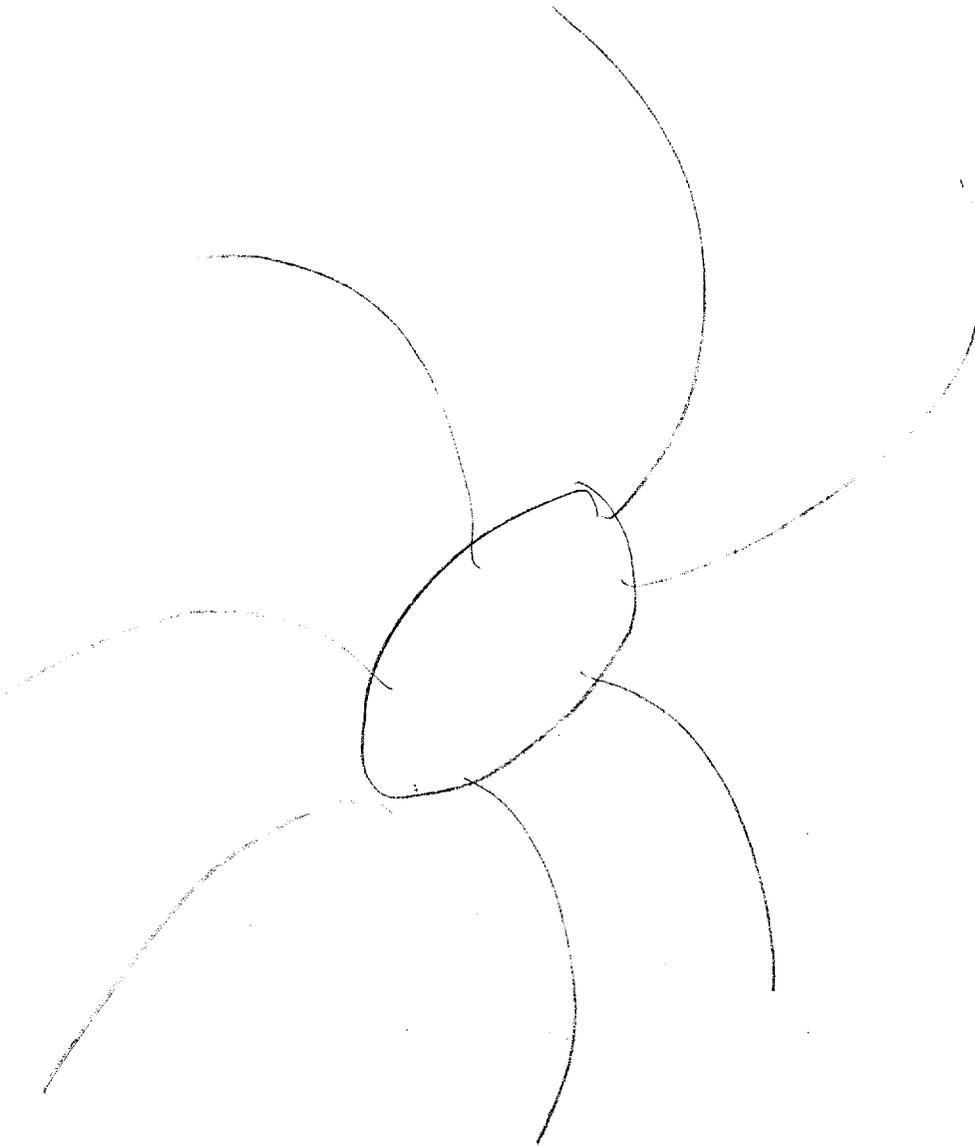

Water is important - not directed to land, people - directed at a system on water - near water.

Sept

Hill on water

oct

Fixed
moves faster when in this
position.

Now

part
of the
system
