REPLY TO
ATTN OF: DT-SSUBJECT: SESSION SUMMARY, PROJECT 8715 (C/SS)
SG1JTO: DT-S (ATTN: [REDACTED])

1. (S-SS) Statistics:	Project #:	8715
	Viewer:	018
	Session date:	23 SEP 87
	Filename:	8715.L01

2. (S-SS) The perceptions gained from this session were of very dubious nature (see item 3, below). They were repeated perceptions of a mound or pile of powdery substance, white and/or grey in color, with a warm/sour/bitter taste.

3. (S/SS) Viewer's critique: I was having a very bad day in all respects on the day of the session, and was tending to not function well in any area of my life. While the one perception listed above did, and still does, have a valid "feel" about it, the form of the session (in particular, the singularity of perception, and the inability to depart from that to other site aspects) is a valid indicator that the content of the session should be disregarded, and another session performed to replace this one.
