

SECRET/NOFORN-SKEET CHANNELS ONLY

PROJECT SUN STREAK (U)

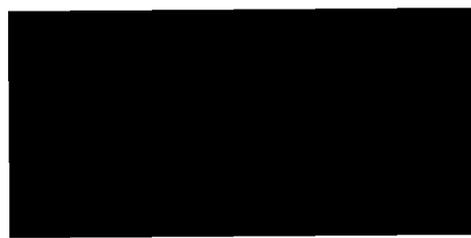

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

Session Procedures Report (S/NF/SK)

PROJECT NUMBER: 8709 SESSION NUMBER: 2
DATE OF SESSION: 17 AUG 87 TARGET COUNTRY:
REFERENCE: MISSION STATUS:
TECHNIQUE UTILIZED: CRV SOURCE IDENTIFIER: 011

1. (S/NF/SK) Monitor Tasking: Refer to tasking packet for initial tasking.
2. (S/NF/SK) Source Tasking: Only the original coordinates provided. Due to a source problem of perceiving the targets dimensional aspects, Stage III was skipped, with the intent of going back for a sketch after more target contact had been established in Stage IV.
3. (S/NF/SK) Summary: Source summary attached.
4. (S/NF/SK) Comments: Source experienced some degree of difficulty in an attempt to discriminate the circular object from the large, pointed object, both in close proximity to each other; ergo the difficulty in Stage III. Now that this problem has been overcome, (i.e., source can discriminate between the two objects), subsequent sessions will easily resolve many more details regarding both of these "gestalts". Monitor places a high degree of confidence in the validity/accuracy of information, albeit scanty, provided by the source in this session.

SESSION SUMMARY

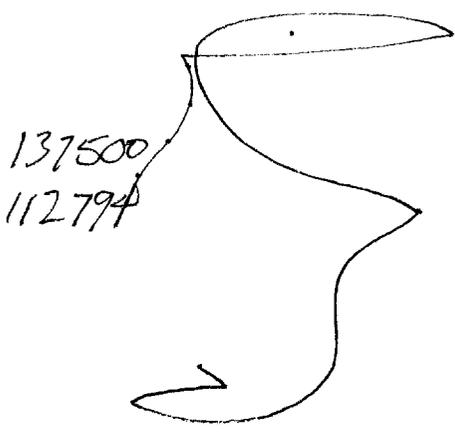

SESSION: 17 AUGUST 1987, 0830 hrs

This site/target appears to be an object. This object appears to be dark in color, a blue/black. Its surface is hard and smooth. Other colors, such as orange, yellow and green are present but appear to be in the background or on the inside. There are components that are flat, angular and straight lines are apparant. There is also something that is curving, circular, and appears to be in motion.

There seems to be some kind of circular object with an appendage. This is the thing that is in motion. It appears to make contact or brush something that is pointed, gray, metallic, is large and has a textured surface, but is smooth. . . . surface is crystalline, coated.
