SUMMARY OF INFORMATION

The target is a structure that is constructed of concrete or stone (see sketch). This structure has what appears to be pillars or columns located at the front of it. The area around it is mostly grass with a reflecting pool or pond nearby.

The activity at the target was that of legislation or governmental functioning carried out by people. These people entered and left the building freely through the front doors.

I had the distinct impression that this target was much closer than all of the others to my physical location. I also felt strongly that a beacon was not used in this session.
