SUMMARY OF INFORMATION

The site is a large, mainly metallic structure in a flat, open area. There is a constant clanging sound present. Strong, burly men are working here. They are wearing hard hats. They feel isolated by their work. The structure is very open and doesn't seem to have an inside distinguishable from the outside. There <sup>is a</sup> high metal portion where one man is working, "like" a cat walk. It's ~~is~~ dangerous and he should be wearing a safety line, however, because of time constraints (always present) he does not. Note sketches of aspects of the structure. The site reminded me of something like an oil drill or platform or a commercial building in the very early stages (metal shell) of construction.
