SUMMARY OF INFORMATION

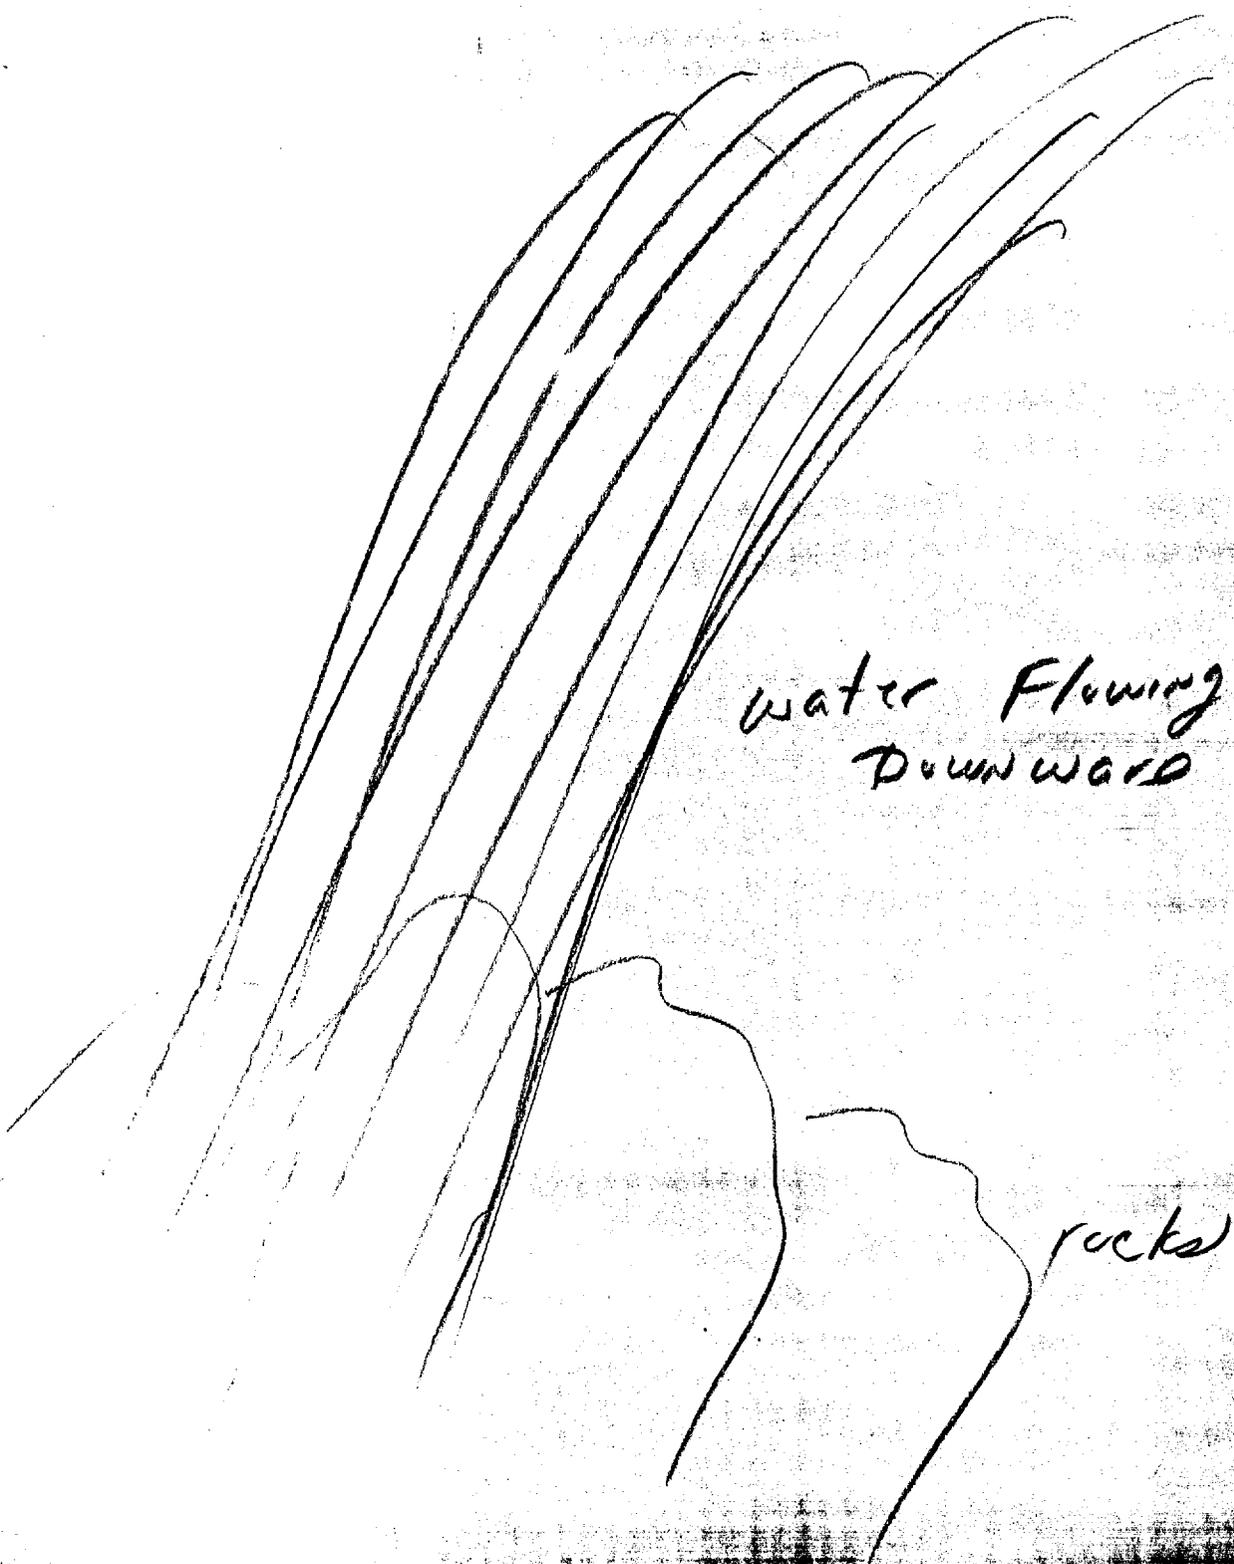

During this session, I first received the impression that something was being held up. Then I received the impression that something was being put down. Then I had a feeling that there was a back and forth motion associated with the site. It was as though something goes up and then it comes down.

I then had the feeling that water was associated with the site. The water was flowing downward over big rocks.

I then felt that I was in a small area that was a narrow room or hallway. I could see long narrow counters here. There was not anything on the counters. It seemed that one has to wait here to receive something.
