M/I: Solo

Summary of Information

There is a strong sense of being under a canopy of some sort--a canopy that is in some way ribbed, suspended, soft, and giving, much like some sort of fabric. An inside/outside feeling is present, as if elements of both are confused in some unusual way. Bracing, struts, guy-lines, cables, tubing, and a general angular jumble of assorted structural components are important to the site, and all seem involved in "putting the thing together." Though white and yellow predominate--as well as a great deal of green (which seems to be lawn or vegetation)--there are many colors present, including a brilliant red-orange color that appears in a thin but noticeable configuration. There is also a strong, not unpleasant smell associated with the site. This location doesn't normally involve large numbers of people, but those present participate to enjoy themselves. Where it isn't shaded by the canopy-effect present at the site, the locale is bright and sunny. Associated with the site was an oblong, rounded-edged object with alternating dark and light stripes of it, that was smooth, hard, and lacquered; the top of this object was able to detach or move in some way. An analytical impression of hot-air balloons was received towards the end of the session.
