

WORKING PAPER

Project: 900104 (W-15)
Date: 04 JAN 90
Time: 1019-1037
Viewer: 018
Session: 01

SUMMARY OF INFORMATION:

1. Describe the target site: The site is an area where a high land drops off sharply to a narrow strip of flat land bordered on the other side by water. Impressions at the top of the high land is that of an "artsy-craftsy" atmosphere, much like that found along Highway 1, along the California coast. At the bottom of the dropoff, a heavy cement structure leads into a long "tunnel"-type opening in the hillside. This long "tunnel" gave more of an impression of being like a drainage pipe than like an access tunnel. Also, there are bars over the ends to prevent human passage. At the far end (inside the hillside), this long "tunnel" intersects with a very large, shiny-walled long area where there is sparse but apparent vehicular traffic.
2. Describe the activity taking place at the site: The only activities perceived were a person walking beside the water on the outside end of the "tunnel" which leads into the mountainside, and vehicular traffic in the much larger area inside the mountain.

WORKING PAPER

1. PROJECT: 9001-04 (W-15).
2. ENCRYPTED COORDINATES: 9001-04.
3. BACKGROUND: Target selection made by SRI International. Project will continue throughout January 1990 unless obviated by operational considerations.
4. ESSENTIAL ELEMENTS OF INFORMATION:
 - a. Describe the target.
 - b. Describe the activity at the target.
 - c. Submit sketches in support of your findings.
