

~~SECRET~~/NOFORN - HANDLE VIA SKEET CHANNELS ONLY

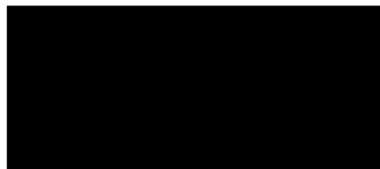

PROJECT SUN STREAK (U)

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

PROJECT NUMBER: 8819 SESSION NUMBER: 4
DATE OF SESSION: 30 DEC 88 DATE OF REPORT: 03 JAN 89
START: 1430 END: 1450
METHODOLOGY: CRV VIEWER IDENTIFIER: 095

1. (S/NF/SK) MISSION: Describe the general mission of the site and the specific activities/personnel/equipment of each target area.
2. (S/NF/SK) VIEWER TASKING: 095 was directed to explore Area E, to include the 'underground' portion previously perceived (see Session 3).
3. (S/NF/SK) COMMENTS: None.
4. (S/NF/SK) EVALUATION: []

CRV
1430-1450

The shielded underground area in Area E did not seem as important today as it did in the previous session. My interest in it appeared to be due to the shielding. The underground room is long and narrow and has lots of pipes in it. The pipes are not connected to anything outside the shielded area but are self-contained. The area gave me as strong AOL of "bomb shelter."

In area E there is a redundancy in the function of the long buildings, they perform the same routine job. (AOL: water and waste management)

The entire facility engages in projects that involve: manufacturing and assembly on a small scale and/or of specialty military items which are components as opposed to entire weapon systems. The manufacture involves precision machining.

An object which looks like a torpedo is machined here. It is 15-18 feet long and is big and heavy. It is a silvery brassy color with a matte finish that is the result of a series very fine grooves (like screw threads) that are machined onto the outside of the torpedo shaped object. These shallow, fine grooves are very close to one another. See sketch page 4.
