6 April 1989

MEMORANDUM FOR CHIEF SCIENTIST, DIA

SUBJECT: SUN STREAK Operational Report - 8905 (U)

1. (S/NF/SK) During the period of 9 February 1989 to 17 March 1989 inclusively, fourteen remote viewing sessions were conducted in an effort to determine the contents and key function of target structures reflected in a copy of overhead photography. There is a distinct lack of correlation in the results furnished by the remote viewers.

SG1A

2. (S/NF/SK) Viewer 025 perceived the implementation of an activity conducted in secrecy in Building "B". See TAB A. Viewer 025 described the activity as a form of experimentation whose application resulted in various reactions to the skin as well as sores and lesions; it also caused a paralysis of the autonomic pulmonary system. An estimated seventy personnel were involved in this research process that ultimately produced a "small quantity of pollutants." The subjects of these experiments appeared to be fearful and reluctant volunteers who received some form of monetary compensation. The "A" and "C" areas did not appear to be of interest to the viewer.

3. (S/NF/SK) Viewer 095 perceived Building "C", TAB A, as being associated with some form of biological testing. There was a strong repetitive presence of test tubes and the use of "reagents" (reactionary agents) handled repetitively on a daily basis. Containers in the form of drums were stored in the vicinity of the target site. The drums contained chemicals described as thick with a "greenish tinge."

4. (S/NF/SK) Viewer 032 associated the target area as being associated with a terrorist activity the implementation of which would result in the kidnapping and abduction of personnel. (OPS CMTS: This data appeared incorrect in view of a lack of correlation with data received from other viewers.) Attention was subsequently focused by 032 on the presence of 18 sealed vials containing and "explosive, poisonous, liquid." Tubes were perceived as being filled with white crystals. The presence of a stainless steel cylinder with a screw-on top was also observed. (OPS COMMENTS: 032 was unable to expound on the nature and meaning of the crystals and the stainless steel cylinder.)

5. (S/NF/SK) Viewer 079 perceived the target as a building, a multi-storied structure, a Soviet embassy or consulate located in an attractive area of a city; 079 noted the presence of children nearby. A group of administrative females appeared busy on the first floor; the presence of preoccupied analytical personnel were perceived on the second floor. A communications monitoring system facilitated by the presence of a microwave dish and located on the third floor appeared to be the issue of main intelligence interest. Additional, intelligence-related activities pertaining to "movements, personnel and assignments," were pursued on an opportunity basis. Viewer 079 indicated that "meetings of high-level officials do not take place at this establishment." Noted that the structure is somewhat of an old building devoid of elevators.
