SUMMARY OF INFORMATION

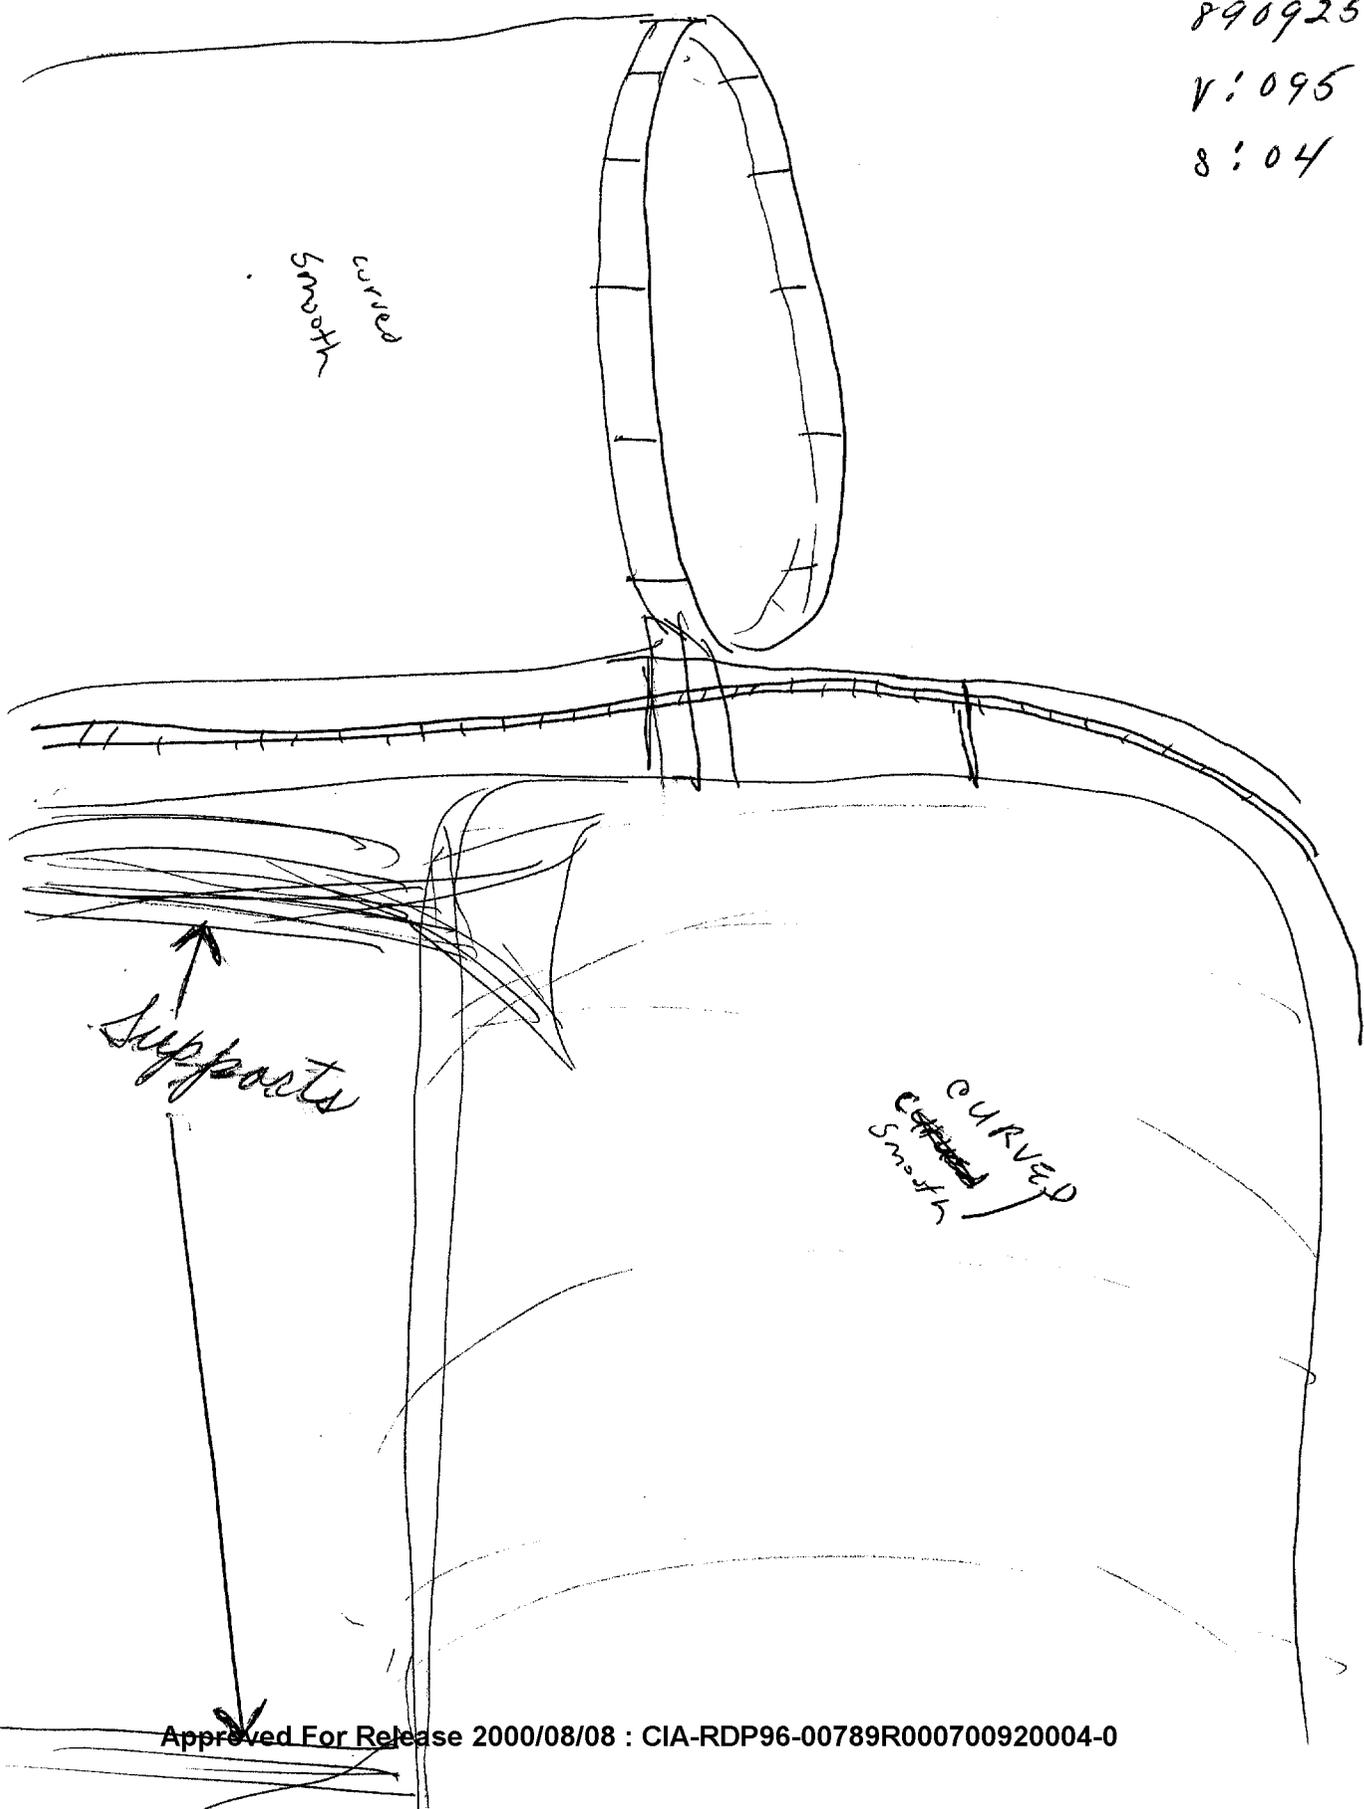

Inside the 3 dimensional, rectangular, smooth, gray structure are the large objects shown in the sketch. Both are curved and smooth. The vertically positioned one is about 20 feet high and reminded me of a "cooling tank". The horizontally positioned object is on raised on supports, the top of it is 50-60 feet off the ground. There is a ladder-like system that goes up and over the top of it. One can climb up this ladder and also get on to the smaller object and walk around it. People who climb up the ladder are wearing white, one-piece outfits with thick, insulated boots. Before they climb they go through an elaborate notification procedure which among other things includes an announcement over an intercom that echoes throughout the whole structure. To climb without going through all this is extremely dangerous.
