WORKING PAPER

F: 8933
V: 095
D: 890901
S: 01

SUMMARY OF INFORMATION

The activity involves two men with face shields cutting through a curved sheet of a composite metal like substance. It is not ordinary metal but a special type of combined super-strong matte-gray material. They are using a tool that is long and the end spins rapidly. The sheet of metal is below them and is at a downward angle. While operating the tool, the man holding it has to kneel on one leg to get the right position. They are in a hurry but not panicky. They are cutting through to extract something that on the inside yet still a part of the metal thing. They must accomplish this within 24 hours or they will abandon the effort due to circumstances beyond their control. The surrounding area gave me a strong feeling of confinement/claustrophobia as if I were underwater or out in space.

Both men are physically very strong and fit. One has short black hair (crew cut), the other has short gray hair. They are wearing matching protective clothing. They are not in charge of this activity (i.e. they were directed to do this) but they are the only people around and are operating independently.

HANDLE VIA SKEET CHANNELS ONLY

~~SECRET~~

The target's location was located in an unclassified area.
