③ OOF: 271130L Jun 90

Located at 1617N 8412W, on a heading of 304 degrees. It is carrying drugs and there is another vessel associated with it in this operation. Possible names of the other vessel are AYIENDA, SPARADA, TORESECA. The vessel appears to be carrying barrels stacked either 3 or 5 across. They are blue, green or blue-green colored with yellow stenciled writing across the cover and/or just below the rim/lid. Some of the barrels contain a sliding tube-like object which slides in and out of the barrel (see diagram). Something (in the barrels?) appears to be either surrounded by liquid or is tightly packed in/by crumpled paper. There is something musty or dark about this vessel which evokes very bad feelings.

OOE: 271130L Jun 90

② Located at 1712N 7820W, heading toward the Gulf of Mexico. It is carrying 200 to 250 kilos of cocaine in submersible containers (may be submersed at necessary times). There may be several vessels associated with this operation, all heading in different directions. Names/phonetics associated with the vessel: CIGA/CIGARILLO/CIGARIO/COMPET/COMET. There are several "very rough characters" associated with the vessel who have aggressive tendencies and a very low educational level.
