Feedback on JT4-0040 (9043)

OOE:

Site is a cluster of structures on land adjacent to a vertical dock. Some of the structures have corrugated tin roofs. Some of these structures are warehouses. There may also be a residence here. The site has a compound feel, as if the structures are related. There does not appear to be a fence but there is a strong feeling of an "early warning system" for approaching cars, vessels, people, etc. All access points are watched/monitored by this system (may be just people not technical devices.) The individual buildings have standard, over-the-counter, anti burglary devices.

The cue of "Activity in response to EEI" elicited the following information: This area is either controlled, owned or operated by cocaine drug operators. At this location stores/supplies are being accumulated. Some of these boxes of bottles containing hard to attain chemicals/precursors. Ether may be one of the items. There is a strong idea that what is being accumulated are "bits and pieces"/items which can be combined to get what the people need but cannot buy. What is being accumulated here are NOT drugs themselves but all the stuff you need to turn a plant into drugs. The elements are not combined here but stored separately.

These items arrive here by vessels/ships and are moved into the buildings. Then the items are transported inland at night. ~~This is done by helicopter.~~ I was not able to determine if other forms of transportation are also involved. The helicopter is not kept at this place: when it comes, it arrives and leaves immediately. Stenciled on the tail of the helicopter are numbers/letters which look like " J (XorZ) 42_ _ _ .

A helicopter may be involved (one

comes to the site).

Stenciled on the tail of the helicopter are numbers/letters which look like " J (XorZ) 42_

U/I vessel 2 (coastal freighter) has a dark hull with large light lettering. It is a Bolivian vessel. It's name is one word, in Spanish, 5-6 letters long. Letters 3 and 4 are "ER." Associated with the English translation of the name are the concepts "feminine" (word may be a feminine word), "calm," and "fragrant." The idea of fragrant made me think of meadow flowers.

U/I vessel 3 has a deep hull (like a keel) and is narrow for its length. It's name IS or MEANS "little _____" (perhaps "little bit"). (I am more confident about "bit" than about "little"). I was not able to determine the number of letters or words in the name for this vessel.

OOC:

There were three small vessels in dock. There were three large buildings in the back. Contraband was being unloaded at one of the small vessels. It was packaged and being loaded onto one side of the vessel. A man was standing outside the vessel and was putting the contraband on to a narrow strip (bumper?) , then sliding it along the strip. It was an unsophisticated operation. When the vessel leaves port, it circles three times if the contraband is on board. A small aircraft is involved in the operation. The man involved is a young man with long black hair. The drugs are inside the bumper of the vessel.

OOO:

The vessel will be a "putter"(?) that has been and will be involved in a drug smuggling operation. The man involved is a younger brother to the man in charge (a king pin or cartel leader). The vessel will sail either 60 or 600 miles east to meet a small aircraft for the pickup. The drug money is laundered through a Florida bank (the word MEDITERRANEAN surfaced). Other phonetics: ON the CUSP, CANCER, MOON, JAKE, ROWELAND and BEFNI.

Target: 900628/⁸⁰~~9043~~ JT4-90-040

Description:

EEL:

1. What is the cargo/contraband being moved?
2. Describe the area (any vehicles, vessels, buildings, etc.)
3. Any names/phonetics (if possible, determine association with vessel, person or C/S).

Q

The vessel will be a puffer
that has been & will be
involved in a Drug Smuggling
operation.

The man involved is a
younger brother to a
man who works in a
~~drug~~ cartel.

The vessel will travel east
for ~~to~~ approx 60 miles
until a small aircraft makes
the pick-up.

The Drug monies are already
laundered & this was
accomplished through a Florida
bank. The work "Mediterranean"
phonetically surfaced here.

"on the cusp" phonetically
surfaced

"Cancer" "Moon" phonetically
surfaced

"Lake"

"Rowland"

B E F T I

This will occur all within an
actionable period of time.

- There were small vessels in dock. There were large buildings in the back.
- Contraband was being on-loaded to one of the small vessels. It was packaged and was being ~~put on~~ on-boarded to one side of the vessel. A man was standing outside the vessel and putting the contraband onto a narrow band (bumper) and then was sliding the contraband down the vessel. This was an unsophisticated operation.
- When the vessel leaves port, it circles the "Bay" three times and then heads out. This is some type of a code that contraband is on board.
- A small aircraft is involved in this smuggling operation.

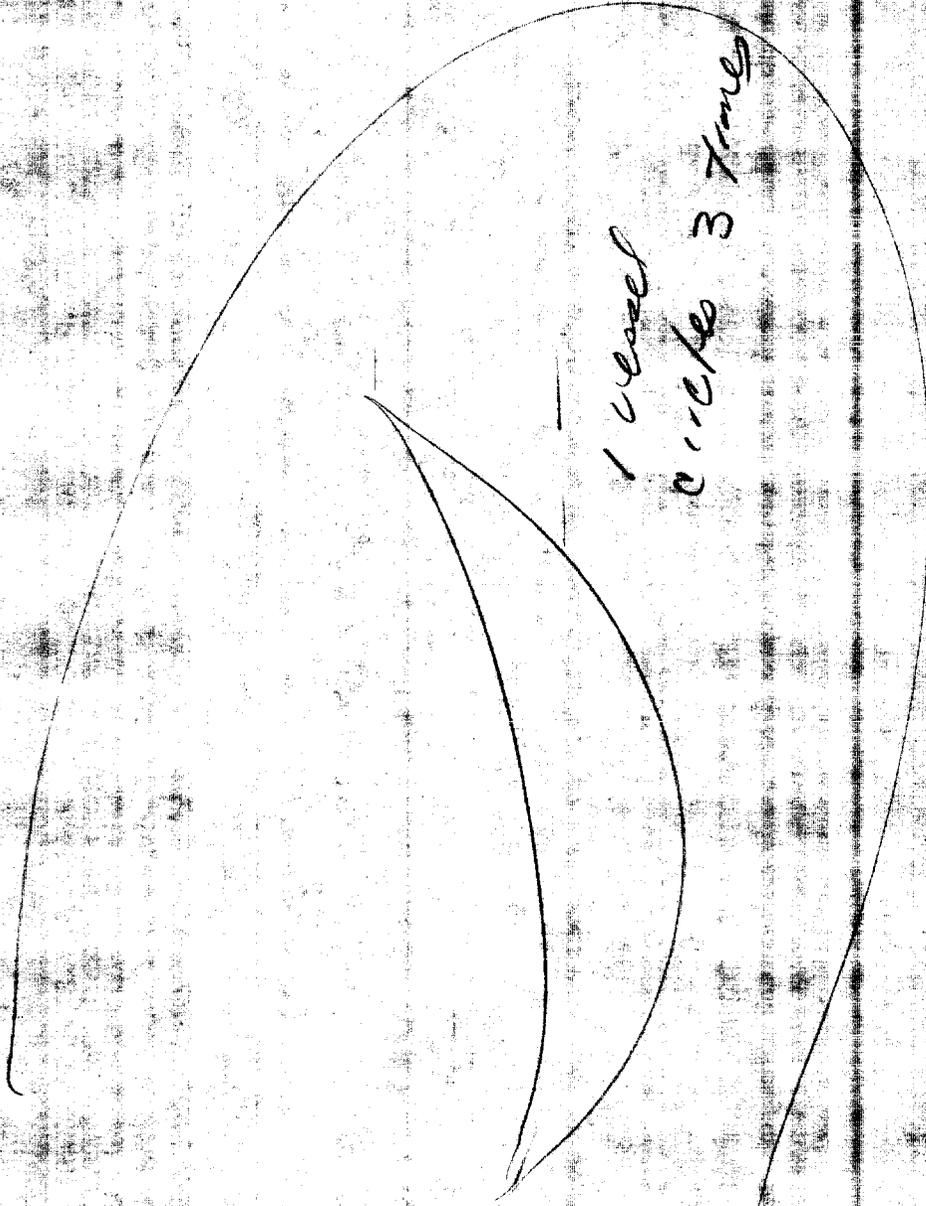

- The man involved is very young with ^{long} black hair.
- Drop going inside the bumper of the vessel.

S4 1/2 Idea of the accumulation of bits + pieces with the intent to combine to get what they need, and can't buy.

S4 1/2 This place is definitely involved/owned/operated by cocaine druggies.

S4 1/2 I get the feeling that what is being accumulated here is NOT drugs itself but all the stuff you need to turn a plant into drugs.

S4 1/2 Don't get the feeling that it is combined here to get necessary complete items. - Items are kept separate.
