SUMMARY OF INFORMATION

The structure is long and square. It is a house. The house is in a warm climate and in a somewhat isolated area. The house is white and has a red plaid roof. There are shrubs and bushes surrounding the house. The house has three side entrances in the front and there may be one entrance in the back.

The containers that are inside the house are small vessels. Liquid substance is inside some of the vessels. Some of the vessels are empty however these containers and/or vessels are inside the house. The liquid substance is highly flammable.

*The containers may be physically moved at a later date.*

There are males and females inside the house. They are a large group that stays very close together. These people are young and they looked as though they were rather dressed up. These people want to stay hidden.

The house is nice inside and there is some nice art pieces inside the house. Other than this, it just looked like the inside of a house.

The letters "A G A" phonetically surfaced. The names "Althea/Allthea" and "Theodore" phonetically surfaced.

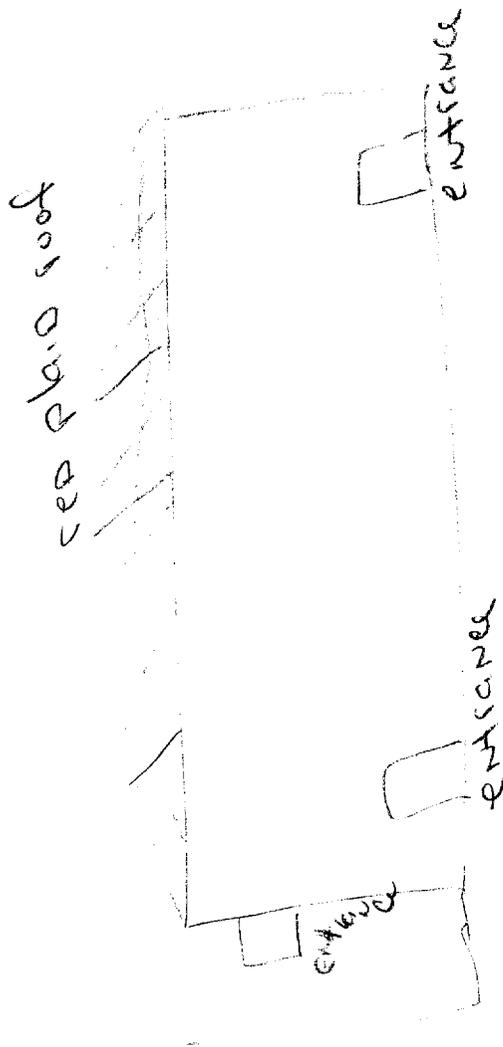

This project may be drug related.
