UNITED STATES GOVERNMENT

memorandum

DATE: 20 Jun 90

REPLY TO
ATTN OF: DT-S

SUBJECT: SUN STREAK Report - 9033 (U)

TO: ODCSINT, DAMI-PO

SG1A

SG1A

1. (S/STD/NF) On 12 and 14 Jun 90, three sessions were conducted against the target vessel known as the [REDACTED] a

[REDACTED]

SG1A

Mexico. The [REDACTED] was last sighted on 9 June 1990 south of western Cuba and sailing east.

2. (S/STD/NF) Viewer 025 reported that the vessel was located near 16° 00'N/76°00'W, about 300 miles southeast of Jamaica. The drugs are headed for Jamaica and will be transported to land at a point between Portland Point and Port Royal. Location of the illegal drugs aboard ship is "in the upper area of the vessel near ski masks".

3. (S/STD/NF) Viewer 052 reported that the vessel was located at 16°15'N/81°30'W and enroute to Kingston, where it will arrive on 15 June 1990. The on-board location of the drugs is in a container with small, shiny, solid, bright, round items, some of which may have holes in the center, and all of which are bunched together and firmly packed. The transfer point will take place in the vicinity of Guantanamo, Cuba at approximately 17°15'N/75°00'W.

SG1A

4. (S/STD/NF) Viewer 095 was unable to determine the vessel's current location. The [REDACTED] was carrying over 15 kilos of cocaine located just below the deckline on the port side, in the extreme bow of the vessel, and under a layer of metal. The present destination is a transfer point at 19°04'N/82°12'W located west southwest of Georgetown, Cayman Islands. It will arrive at this point on 18 June 1990 between 1930-2300 hours to transfer the contraband to a 60-75 foot commercial type vessel (NFI).

~~SECRET/STD/NF~~

5. (S/STD/NF) There is little correlation among the viewers on the current location of the vessel and the offload/transfer point. Viewer 095 identified the drugs as cocaine and 052's information tends to confirm this.
