# memorandum

DATE: 13 APR 1990

REPLY TO ATTN OF:

DT-S

SUBJECT:

SG1A

SUBJECT: SUN STREAK Report - 9017

TO: BRANCH CHIEF, DT-S

- (S/STD/NF) From 10-14 April 1990, four remote viewers (# 025, 032, 049, and 079) conducted a total of one CRV and three SOLO sessions in an effort to answer requirements against the suspected narcotics smuggling vessel known as customer provided the following EEI:
- Is the vessel carrying contraband narcotics, if so, where on board is it stored?
- If not will it on-load contraband in the very near future? If yes, provide details.
- Determine the current location and heading of the i... vessel.
- Determine the date, time and location where the contraband narcotics will be unloaded/transferred.
  - e. Determine and describe the vessel's route of travel.
- 40.0 (S/STD/NF) 025 reported that the vessel contraband narcotics which are stored in a wall cabinet to the left of a stairwell/room near the bow, just below the deck. drugs are contained in small duffel bags. The vessel is currently (12 0845-0945L APR 90) located at 14 30' N 71 W. drugs will be off-loaded at 17 N 67 W, near Puerto Rico. are Spanish men on board the vessel.
- 3. (S/STD/NF) 032 reported that the vessel is not currently (11 1030L APR 90) carrying contraband. It has that capability, but whether or not that shall occur depends on decisions yet to be made. There is an intelligence net that will make this decision based on risk data available. The vessel is currently (same time) located at 17 07' N 64 09' W, heading 230 degrees. The vessel is heading toward its destination of 12 03' N 71 01' W (Puerto Estrella, Colombia.)

# SPECIAL ACCESS REQUIRED

- -(S/STD/NF) 049 reported that the vessel is currently carrying contraband within one or more large shipping containers located in the last row, along the port side of the deck cargo area. There are crates within these shipping container(s). The contraband consists of both narcotics and automatic arms/weapons. These are not located together. The crate containing the narcotics contains a number of smaller blue and white stacked metal containers. These metal containers are truncated with rounded corners: dimensions are: length: 8-10"; narrow end: 3-4"; wide end: 8"; thickness: 6". These containers normally contain animal products or meat. Some of these cans 🚧 contain meat , however, others contain a dry substance. This substance is encased with orange wrapping with a blue label stamped on the outside. This is, in turn, surrounded by a very dense, clay-like material. This composite is then sealed within the can. All of the metal containers, meat and otherwise, look identical. The vessel is currently (10 1230L APR 90) located at 14 45' N 67 33' W, heading northwesterly.
- 5. (S/STD/NF) 079 reported that the vessel is carrying contraband narcotics which are located below deck just above the waterline near the stern (C-8 on the notional ship grid). The current (11 9000-1000L APR 90) location of the vessel is 13 N 65 W, heading northwesterly. The vessel will be travelling toward the Gulf of Mexico for the off-loading of the drugs.

6. (S/STD/NF) Located at TAB A is a map showing all the points provided by the viewers. Located at TAB B are all the viewers' session summaries and EEI report sheets.

#### SUMMARY OF INFORMATION

The target does not appear to have contraband aboard. I did have the perception that it has on occasion carried illegal contraband — but I was not able to detect any on this voyage. The current location of the vessel is 17 07' N / 64 09' W. The vessel is sailing on a heading of 230' and is destined to take port at (Puerto Estrella) location, 12 03' N / 71 01' W.

I had the perception that there were intelligence sources watching this vessel and conditions surrounding it.

If there was a minimal risk then the vessel would be loaded with illegal contraband — if the risk was not diminished then vessel would not be loaded.

ESSENTIAL ELEMENTS OF INFORMATION REQUESTED IN ORDER OF PRIORITY:

1. Is the vessel, \_\_\_\_\_\_' carrying contraband narcotics, if so, where on board is it stored?

RESPONSE: Yes. Within one or more large shipping containers located in the last row, along the port side, of the deck cargo area. There are crates within these shipping container(s). contraband within one or more of these crates consists of both narcotics and automatic arms/weapons. The former is separated from the latter. The crate containing the narcotics contains a number of smaller blue and white stacked metal containers. metal containers are truncated with rounded corners in shape and Length: 8"-10"; Narrow End: 3"-4"; Wide End: 8"; Thickness: 6". These containers normally contain animal products or meat. Some of these cans do contain meat, however, others contain a dry substance. This substance is encased with orange wrapping with a blue label stamped on the outside. This is, ingaturn, surrounded by a very dense, clay-like material. This composite is then sealed within the can. A All of the metal way. containers, meat and otherwise, look identical.

2. If not, will it on-load contraband in the very near future? If yes, provide details.

RESPONSE: NA.

SG1A

Determine the current location and heading of the vessel.

RESPONSE: Location: 14 45'N 67 33'W heading northwesterly.

4. Determine the time date and location where the contraband narcotics will be unloaded/transferred.

RESPONSE: No data.

Determine and describe the vessel's route of travel.

RICPONSE: See number J.

### Summary of Information

The target is a ship. There is a throbbing and pulsating motion (up and down; in and out) associated with the target.

There is a sense of stacked barrels or cans. Green, gray. light blue and stripped colors as well as parallel curves, crosses, angles and corners are associated with the overall target. There is a sense of heat with heat waves rising above/from something. Something feels partially buried. There are soil and water associated with the site. A surface somewhere on the target is peeling and there are tastes of paint, straw and dried grass. Surfaces range from wavy to soft and matted.

There is an activity associated with the target. It involves the sound of metallic banging. Colors are dull and plain and dark streaks occur within the area of activity. A galley is present and it is really hot nearby. The galley is well used, contains tables and there are varying amounts of people present. The people are mumbling and a specific activity involves a repetitive movement or motion.

The item of interest is associated with the colors brown, white and shiny. There are wooden objects and/or wood present. There is an unkept aspect to this area.

At the cue "Item N", rows of something were perceived. There are slanted angles, corners and something short and/or squat. A sense of energy input/? output is associated with these dimensionals. There is a processing of information occurring within this spot.

There is a tall man standing and watching. He is very fit physically and athletic and is wearing white pants. He is light-skinned with short, reddish-blond hair and is balding. He has a sense of aloofness about him. He doesn't allow himself to get too close to others. This would produce a conflict of interest. There is a military and highly disciplined sense currently about him.

Handle Via Skeet Channels Only

#### STD

The target is a medium—sized vessel and has 3 layers of containers on its top surface. These containers resemble semitruck trailers without wheels. The containers are stacked three-high in the middle cargo section and one high at the front and back of this area. The predominate color associated with these containers is an ugly—blue, either turquoise or aquamarine greenish—blue. (The view of the ship as described here is from the starboard or right side). The hull has splotchy spots and a dark narrow strip runs the length of the vessel about 3/4's of the way above the waterline. The numbers "4" and "7" appear near the front (bow) and below the strip. There is a layered section or area on the back of the ship which is white with rusty areas. It's surface appears unkept. Railings, stairs, ropes and the color orange are associated with the outside of this section.

A feeling of anxiety and danger is perceived. It feels as if something very bad is going to happen and it can't be prevented.

There is contraband present and a sense that it consists of both arms/weapons and narcotics. One or both items are within one or two of the large containers. These specific containers are located in the last row, along the left side, of the cargo area when looking from overhead. There are automatic weapons packed in crates or cases made of wood within one of these containers. There is a smell of animal products or meat near the area of the weapons and a sense of objects that are tightly packed within a crate.

At the cue "Inside Crate", there is a perception of stacked metal containers with a smooth, blue and white colored surface. When viewed from the top, these objects have a rounded, truncated shape. Some of the metal containers within the crate are leaking and obzing. The size of these metal containers is:

Length: 8"-10"
Narrow End: 3"-4"
Wide End: 8"
Thickness: 6"

Handle Via Skeet Channels Only

CONTRACT STD

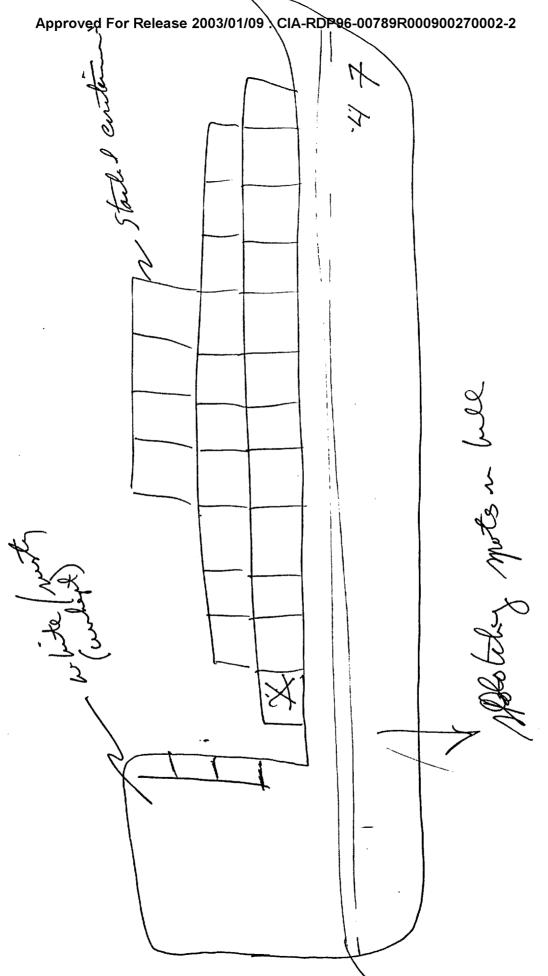

There is a sense that inside the metal containers, some are wet and some are dry. The metal containers that are perceived as dry are tightly packed inside. The contents of the "dry" metal containers are surrounded with an orangish wrapping. There is a sky-blue emblem or mark, resembling a heraldic crest, on the orange wrapping. The wrapping is sealed. There is something between the metal container exterior and the wrapping or paper. It is a layered affect. In cross section, the layering, from outside to inside, consists of: the metal container exterior, a layer of very dense, clay-like material, the wrapping or paper and finally the dry non-meat contents.

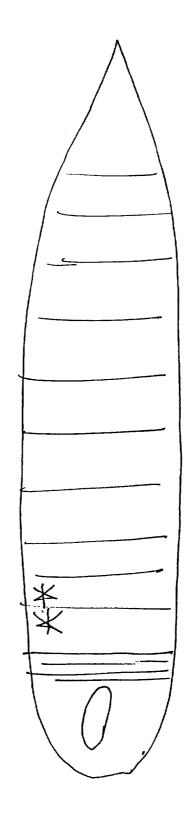

Again, there is an overpowering sensation of a violent act to be committed; a feeling that someone is going to die violently. There is going to be a terrible event.

The present location of the target vessel at 101230L APR 90 is approximately 14 45' N Long., 67 33' W Lat. It is currently traveling in a northwesterly direction .
