REPLY: Results indicate the presence of a group of structures placed on a hillside amid lush vegetation amid rolling hills. Water was perceived as being located at the foot of a hill in the immediate target area. A water tower was present. The presence of a shed where drugs were stored was reported.

ACTION: Results indicate a good feel for the area of concern. No water tower was known to be present. Isolated sheds are a common feature in the area. The water perceived at the foot of a hill is a true statement.

EVAL: Some correlation. Results assessed against known operational data.
