V: 079  
S: 01

SUMMARY OF INFORMATION

The site consists of two big, white buildings standing beside each other. The identical buildings are rounded and they have domed roofs. They are sitting behind a gate or a fence. There are letters in red that identify the structures. The letters on the sign that identifies the structures are placed high.

The site deals with machinery or industry. The site could be an industrial complex. The site is placed near an area that has activity. There is regular traffic of cars and business. The site is not isolated.

SUMMARY OF INFORMATION

The site consists of two big white buildings standing beside each other. The identical buildings are rounded and they have domed roofs. They are sitting behind a gate or a fence. There are letters in red that identify the structures. The letters or the sign that identifies the structures are placed high.

There were men at the site moving large objects. The site deals with machinery or industry. The site could be a small industrial complex. The site is placed near an area that has activity. There is regular traffic of cars and business. The site is not isolated.

A second aspect of the site deals with security or police cars driving from the two identical buildings to smaller buildings in the area. These smaller buildings can be identified as warehouses that sit along very narrow roads or alleys.

The men driving the police or security cars are in uniforms and they may be transporting people.

*or an important person.*

*The cars entering the buildings from the back.*
