SUMMARY OF INFORMATION

The target site has uneven terrain consisting of small dugouts or sand hills. The air is cloudy or smokey and there are rocks in the area. Many people are at the site to include both men and women military personnel and workers in mechanic jump suits. A concrete structure is to the far upper right with a door in front. Iron or steel tall, thick, barred mesh structures exist. Mud can be found in the area. There are metallic cylindrical tanks or containers which have a coiled top apparatus. These tanks are filled on the surface. A wet substance is on broken ground.

The purpose of this target is for scientific assembly and there are monitoring screens present. This is a kind of ground base for a basic human need. There is also a tiny round circular object in the center of the site.
