PROJECT 91007

23 Jan 91

SUMMARY

1. (S/NF/LIMDIS) TARGETING DATA: A sealed envelope of the target site was provided to DT-S with task instructions attached. This sealed envelope was not opened and was returned to DT. The attached instructions were followed.

2. (U) TASK:

(S/NF/LIMDIS) Describe activities and purpose of target area; provide backup sketches.

3. (U) RESPONSES:

a. (U) SOURCE 049:

(1) (U) DATE OF INFORMATION (DOI): 23 Jan 91.

(2) (S/NF/LIMDIS) DATA SUMMARY:

- Site function is associated with unusual emanations and has numerous automatic functions:

o High technology diagnostics.

o Emanations may cause physical maladies (i.e., nausea, headaches).

o Flashes of blue are relevant.

- Object/equipment associations include:

o Large pyramid or peaked shapes (FIG 1), with humming sounds and spinning motion.

o May be flaps on the object.

o Bars and disks are also present, with rings (FIG 2).

o Many disarrayed thin elongated objects are present.

- Overall area is flat with features incorporated into very rugged terrain.

b. (U) SOURCE 052:

(1) (U) DOI: 23 Jan 91.

(2) (S/NF/LIMDIS) DATA SUMMARY:

- Function is associated with storage and loading, possibly with underground aspects:

o May have chemical munitions.

o Shaking and vibration motions are associated, with some circular motion.

o Ceiling may have a sliding/opening capability, and may be made of very thin metal.

- Main object(s) have missile-like shapes.

- Various smaller objects have fan type shapes (FIG 3).

c. SOURCE 079:

(1) (U) DOI: 23 Jan 91

(2) (S/NF/LIMDIS) DATA SUMMARY:

- Main function seems to be related to mines:

o Possibly mine assembly, mine staging/deployment.

o Mines seem to be of a shallow surface type.

- Main site area is heavily dependent on a river or some type of water supply, though it is not near a river.

o Area may have a natural mining function or once was a mineral mine.

o Some association to "mile" or "nile".

o Area is in a Mid East country.

(Different object)
Rounded object
Shiny in middle
3-4 Blade-like shapes
Around it

4. (U) REMARKS:

a. (S/NF) Main sense of area is that it is remote, and may be involved in some sort of munitions storage/staging activity.

b. (U) This target can be reexamined to focus in on main aspects of interest.

5. (U) ADDENDUM: This section includes data provided by an additional source after the initial report was completed:

a. (U) SOURCE 018: (DOI: 24 Jan 91).

b. (S/NF/LIMDIS) DATA SUMMARY:

- Site may be a shallow-buried missile launch facility.

- Site appears to have one-story cinder block structures with sloping walls that have earth-cover to blend in with terrain:

o Surrounding area has natural looking indentations.

o There seem to be thin translucent panels to the walls.

o Long pointed cylinders (probably missiles) may be inside the buildings.

o Possible missiles launched from within the building "break through" the translucent panels.

- Front ends of the cylinders seem to have a compressed mixture with a sticky, rubbery texture that is probably a high energy explosive.
