SUMMARY OF INFORMATION

The area is a Middle Eastern country. The area is divided up into all pieces or stripes of land. Water is important to the site however, water is not near the land that was viewed.

Men, women and children are involved at the site. They were dressed in Middle Eastern clothes and they looked poor.

Farming and mining are important to the area and it looked as though this is what the people were doing. They were laying down mines. *The mines lay on top of the land.*

Eventually the people will leave this area because there will not be able to live here because nothing will be available to them. *mass exodus*

*" Nile River " phonetically  
surfaced.*
