SUMMARY OF INFORMATION

The target is located outside, in a wide area, with the main color being green. There is a large structure of some kind, possibly made of stone, with one side being flat, and the other side jagged, which looks like steps leading down it. There are smaller structures within the area as well.

There is a woman located at the target, who is laughing, and several four-legged, fuzzy things, which makes me think of animals in a zoo. But these animals seem to have a purpose for being here. They do not seem to be zoo-type animals. They are more like rabbits, cats, or mice, as if used in a laboratory.

There are also two solid objects which seem to be moving in separate directions (concentric circles?), one is turning one way, and the other another way.

The activity at the target is fact based, educational, you can learn something from it, but it is also entertaining and interesting.

Summary

The target seems to be a large structure with some kind of steps leading down one side. There are two shapes facing each other. They are moving in different directions.

The main color is green,  
There are four-legged fuzzy  
things at this site (like animals)  
that makes me think of a zoo.
