- E. SESSION SUMMARY:

SG1A [REDACTED] is a derivative of a name and is analogous conceptually to a smoke alarm system. The system is associated with an individual. [REDACTED] can be picked up within a certain long circle or radius. It reacts almost like a radio signal/dispatch which can signal intelligence. It is a form of communication which determines or signifies when things are within a certain circle or radius. [REDACTED] answers the military preliminary. This is a means of indications and warning of certain technical activity within a given area. [REDACTED] is a machinery device complete with an engine which has currents and can be detected, thus shedding light on certain activities.
