

Feedback on JT4-078-90 (25 Jul 90)

00B: 251104 JUL 90 SG1A

The activity at [REDACTED] involves a long, curving series of "structures" (buildings or other "manmades"), lined up to the left of a loading/unloading area. The loading/unloading area holds some sort of crane apparatus. The drug activity on or about 20 JUL 90 consisted of loading drugs into small vessels which then "ferried" them to a larger vessel (NFI). This shipment may have been a partial shipment.

In a related activity (may not have been at the same port), a submarine made a surface docking on or about 22 JUL 90 to deliver goods in the form of money, ancient artifacts, and possibly some emerald jewelry.

There are indications that another part of the partial shipment will occur on 27 JUL 90 at the other port. This shipment should consist of approx. 1400 kilos of drugs. These drugs will be in a gooey, funny-smelling mixture with some other product (possibly similar to frozen quava juice).

The related port appears to be either [REDACTED] SG1A

OOG: 251300L

Many vessels pass through this port including drug vessels. However, the emphasis, as far as illegal activity is concerned, is on other forms of contraband. Smuggling of items such as: jewelry, fire arms etc...can be found in bags aboard some vessels. The purpose of this port is for working maintenance and it serves as a radio active communication watch facility. From July 20th, thirteen vessels past port and have successfully gone onward. Of these, two (a team) were drug related. In the future, there will be 5 drug vessels which pass through this port by November of this year. A basic sketch of the port is attached.

OOD: 251355L

The port is long, coming to a point on one side and is more rounded on the other. A curved, hard, grainy strip of cleared land comes off to one side of the port. On 20 Jul, there were two vessels in port carrying drugs. The drugs on both vessels appeared to be marijuana. One of the vessels has a white hull and red superstructure, located approximately amidship. The other vessel is dark blue. Something about this vessel is rounded, curved and has grooves in it. It also has rows of little rounded bumps on the side of the hull.
