SUMMARY OF INFORMATION

A structure which is islamic or baroque in design has similar structures around [redacted] in a city area (see sketch on page 1). The site I focused on nearby is an open isolated area with

[redacted] grasslands, fences, few roads, and [redacted] tall trees in the background.

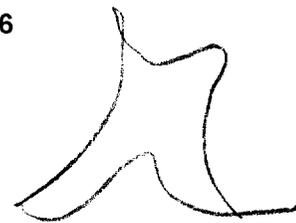

[redacted] A separate dirt pit is present. A radio communications tower is to the right with a box shaped object on top (bird house).

Lightning streaks shoot outward from this portion. [redacted] to the

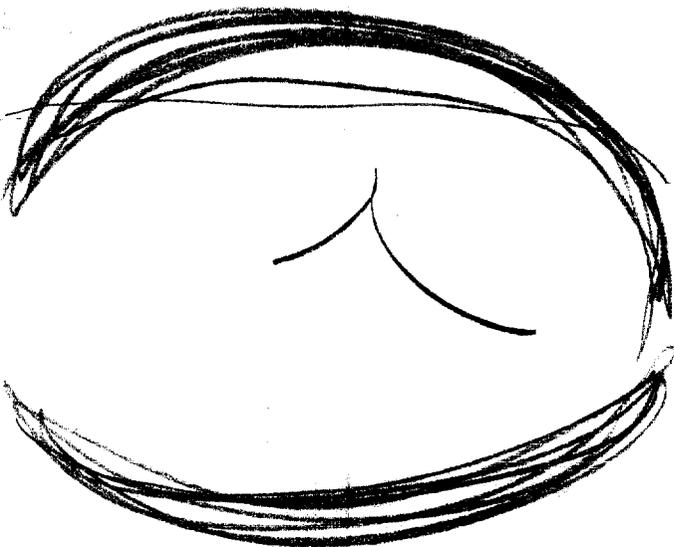

[redacted] around, there is a giant circular metallic bell shaped object (UFO, advanced technology) and to the far left a single small barracks structure (see sketch on page 2). Other objects at the site include a small vehicle with a drivers wheel and two long barrel shaped metallic items attached together, wherein one is longer than the other (see sketch on page 3). Inside either the bell shaped object or the barracks, there is color TV monitors (visual aids on page 4), with knobs which show places of what is happening. [redacted] 20 military uniformed men (armory) with

dark features, ties, and stripes down the sides of their pants, are working by utilizing energy resources on a current special project (testing). This is a small facility which is not commercialized. Flight network is of concern. [redacted] The tower involves land to air communication relay systems which provide images on screens (security scanners).
