Summary

Manmade structures on a land water interface. Rounded
structures present. Large, sprawling, angular structures with
maze-like interior; pipes, controls, and smells, people in coveralls;
people present were very occupied, at a hectic pace, checking things,
discussing; maintaining. There were 2 parts to facilities - one
part dealing with heavy, industrial-like machinery, some power
generation. The other part quiet, organized, scholarly, used for
planning, thinking, & engineering. People were educated, idealistic,
excited, worried, anxious, anticipating, suspenseful, satisfied, idealistic,
dedicated, enthusiastic, and related to official government/
paramilitary type activity. Site seemed to have
something to do with space.
