The person at the circular panel was rather friendly
suggested I move to a position behind and observe. The
circular panel looked a lot like an organ. And he appeared
to be playing at it like someone would an organ.

POST SESSION SUMMARY

Summary - site appears to be a structure located within a mountain which has a triangular peak. There is a large lake at the base of this mountain which is surrounded by high rugged mountains or cliffs, it seems fairly impenetrable. There were two people walking around outside of the structure and two people inside the structure. One of the people inside the structure sat at a circular position which appeared to look similar to an organ because of the keys, buttons and switches (the word "OBSERVING" comes to mind).

The appeared to be some sort of screen or monitor, but could not make it out clearly.
