

SECRET/NOFORN - HANDLE VIA SKEET CHANNELS ONLY

PROJECT SUN STREAK (U)

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

-----

PROJECT NUMBER: 8815	SESSION NUMBER: 5
DATE OF SESSION: 9 NOV 88	DATE OF REPORT: 14 NOV 88
START: 1335	END: 1430
METHODOLOGY: CRV	VIEWER IDENTIFIER: 095

-----

1. (S/NF/SK) MISSION: Describe, and identify the mission and origin of, 'Object B.'

2. (S/NF/SK) VIEWER TASKING: 095 was directed to begin the session in Stage 4 and then to reacquire, and continue to describe, the area perceived in the previous session. After moving into Stage 6, another viewer (#011) was called into the viewing room to augment the perceptions (i.e., provide another pair of 'eyes') as the interior of the area was explored. (See separate report)

Session Summary  
Viewer 095  
9 November 1988  
1335-1430

Site is same structure described in previous session. The natural formation behind the structure is steep, rocky, jagged and mostly black and gray in color (see sketch page 2).

The large, wide door to the structure opens in one piece. The first room is the large, open bay type area described in the last session. Behind this is an even taller area that is divided into rooms that are compartmented somehow. The rooms are made and can be changed by walls that move into place to divide the area. Behind this area, hallways go back into the natural formation. This is in a Y shape. The right hallway is higher than a normal hall and about 8 feet wide. Something similar to cabinets/shelves line the hallway. Concepts associated with it are "storage" and "isolation". At the end of the hallway is a sealed wall or door which is flat and smooth. There is a rubber-like seal which goes all the way around the flat smooth area but is not visible because it is behind the wall of the hallway (see sketch page 4a).

Inside the cabinets things are stored. The cabinets have long drawers which slide in and out (for a sketch for how the "things" are stored see page 5). The "things" involve stored units of energy, but that have mass "like" nuclear materials. These "things" are assessed.

This place appears to be very governmental. To conceptual activities are associated with it: either the "things" are brought here for assessment and stored in the process or someone wants to assess the "things" which are (permanently) stored here. Associated with these concepts are the ideas of transportation and storage.

The left hallway seems to widen as it goes back, both vertically and horizontally. There is a row of small rooms either on one side of the hallway or below it. The area is very aseptic.
