

27 -31 Jul 87

SG1J

SRV  
Ft Meade  
16 July 87

SUBJECT: Results of SRV sessions for week of 13-17 July, 1987.

1. Picture will be of an object. This object has the appearance of being made of wood. I can only get impressions of a specific spot on the object: where two straight portions of the object come together at a bend. The sides of the object are "ridged", "notched", "slotted", "grooved", (or whatever), with the grooves running lengthwise along the object. The surface of the object is very smooth (AOL: like varnish). Object is somehow outlined in dark blue color.

2. RVer's critique: Strong belief that I was "doorknobbing" very badly. I tried to move back and get an overall look several times, but each time, went completely blank (couldn't even get noise or garbage). Perceptions "felt" very valid, but probably only depict a small portion of the target picture.
