- E. SESSION SUMMARY:

The document was discussing an industry/technology/business that dealt with a very dark substance or source that had to be processed. The document was discussing how this substance or source was processed. Large "bins" were involved in storing the material. People here worked hard. I had a feeling of physical labor. This source or substance may come from under the ground.

The word "ring" came to mind. Also, the word "peppin/peppin" phonetically surfaced.

CPYRGHT

*An eyeball on the enemy—day, night, or bad weather—is the final connection in the target-finding system mounted on the nose of the U. S. Army's Advanced Attack Helicopter. In simulated combat, test pilot Bill Norton (**left**) sees in his electronic monocle an image of an enemy tank (**right, at top**). As he turns his head to follow the target, sensors in the cockpit monitor the movement of his helmet and aim the weaponry automatically. At his command, a laser-guided missile fires, runs to its target, and destroys the tank (sequence at right).*
