#### E. SESSION SUMMARY

The key geographical features of the target photo include green and brown ground at different levels. There are trees, mounds of land growth, and high and low points. A fencing or barrier can be found in the area. This location is well above sea level and it emphasizes the high and low points on land pictured. The target land site is not highly populated, and could be considered fairly clear of people residing. It can become quite hot generally, or cool at certain times (at night) depending on the level of land featured. This area is weather dependent concerning precipitation.

"I felt a little tremor," David Livingstone admitted in 1855, as his canoe surged toward the thunder of the mile-wide falls he named for Britain's Queen Victoria. A plane (above) now carries tourists above the torrent of the Zambezi River, where the explorer saw "a dense white cloud with two rainbows." Pale moonlight recaptures one such rainbow in a haunting time exposure (right) that also records a star track.
