E. SESSION SUMMARY:

The target contains a number of features which are comprised of shaped and squared stone. There is a central feature which is tall and circular and extends up above the immediate surrounding area. There is a shimmering and rapid, violent movement of water associated with this object. There is a large, white area and an area that is flat and green. There is green, yellow, white, blue, black, crimson and flesh-tone colors here.

A large object is curved and "rolled" and consists of iron. There are dogs barking nearby. An U/I object is "wrapped-up" and "coated". There are violent flashes of sparks or light with channeled, flowing water associated with them.

The target has a metropolitan European feel to it; more specifically, a Latin flavor reminiscent of Italy or Spain. There are a series of lever-like objects which move up and down. A large, circular object is associated with fast movement and lots of angles reminiscent of steps or stairs.

There is elaborate architecture present. It is very time- or period-specific as well e.g. the vernacular for the period in history in which it was constructed. It is as specific as: the minarets are to the Kremlin; the colosseum is to Rome; or a crusader castle in Spain. Wherever it is, it is very hot.
