- E. SESSION SUMMARY:

Site consists of a large man-made circular object that is yellow or orange or gold in color. This object may have designs inside. The object is sitting outside with hills or mountains in the background. Water is at the site. Green, blue, and brown are the colors associated with site.

There is a second object that sits below the big circular object. This object seems to go off into three different directions. This object has one base at the bottom but at the top, it splits off into three different sections. These different sections look exactly the same and have the same dimensions.

If people are at the site, they are below the big circular object.

- A feeling that a person was standing in ~~the~~ the water. or that a person was standing but not on skin ground.
