Summary of Information

The target contain a rock/land/water interface. There are a number of triangularly-shaped objects cutting or slicing through a softer substance. This scene is reminiscent of a fin or sail cutting through water. However, there are impressions of these 3-sided objects splitting away from a larger, white and solid feature. Again, this produces a movement of water reminiscent of splashes or waves. There are manmade structures in the background. These objects are angular with a lot of space or emptiness attached or associated with them. The water is extremely blue here.
