- E. SESSION SUMMARY:

The target is a structure on land. There is also some form of energetics associated with the target. There are people located at the site, looking up at something. There is a man standing in a doorway. There is also one person that is wearing a hat, like a hard hat. There is movement and activity. It is warm. There is something that is overlapping. Water is somehow associated with the target, but it is not the main part of it. There are many, various angles. There is also something that is blocked somehow, or blocked from view.

The structure itself is very strange looking. One end of the structure is higher and longer than the other parts of it. The sides are smooth and even, but the top of it is not. There is a ray of something (possibly light) shining or emanating from it.
