Summary of Information

The target is a location where a light colored or white area that is relatively flat and with a jagged edge/border appears against or adjacent to a second area that is alot smoother and is deep blue or black in color. A much rougher feature/area rises up from the white area.

The concept of a jagged edge or border between the light and dark areas is very strong. A sense of isolation or detachment is associated with this target.

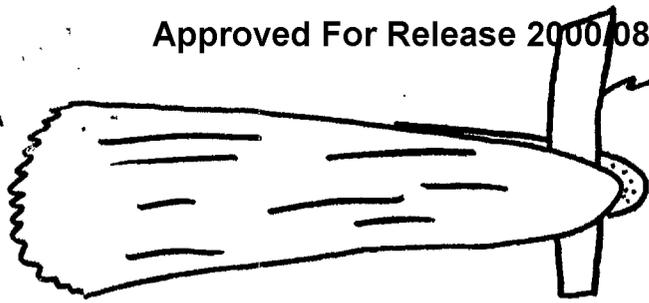

One feature of the target is muddy, slow, smelly and old. There are enigmatic features reminiscent of deep cuts into the earth. There is an isolated tree that is prominent and very tall.

There is a structure manufactured from manipulated wood as well as a support platform of some sort. Another feature is sharp, high, pointed and smooth.

There is a pointed limb or log which is being split by a hard, rectangular object from the pointed end back.

Another feature consists of alternating dark/light "L"-shaped objects. There is the concept of a rotating or alternating projection reminiscent of the function of a beacon.

Another area consists of curving lines which appear stacked upon one another. There is a convoluted outline of a geometric figure at the bottom of the "stack". This geometric figure feels surrounded.
