

DATA SUMMARIES

(S/NF/SG/LIMDIS) Following are perceived highlights from each source. The period covered is 29 October - 2 November 1993.

- (S/NF/SG/LIMDIS) Source A:

-- The vessel is in a very warm climate and is geographically located in the south. Route of travel includes a west, southwestern direction. Dark skinned people are associated with this vessel.

-- The cargo consists of destructive weaponry. The armaments are long and linear in design with destructive agents, which may cause an orange fire. The vessel is elusive and long with one mast that has the color gray on it. Four men and an element of inactivity are directly associated with this vessel.

- (S/NF/SG/LIMDIS) Source B:

-- The ship's ultimate course is in a northerly direction. It is currently stopped near a point of land that is extremely rocky and jagged. This promontory extends out into the water and forms small, isolated precipices reminiscent of an island chain, only on a minuter scale.

- (S/NF/SG/LIMDIS) Source C:

-- The target vessel is white in color. The vessel has a complex communications system on board. The vessel is currently sailing northeast of its original destination. The vessel can be considered a medium sized vessel. The vessel is in communications with a radio tower. A military activity or mission is associated with the vessel. There is a circular object in the front of the vessel.
