Project 94-281-0

SG1A (S/NF/SG/LIMDIS) Following are the perceived highlights from each source. The tasking was "Access and describe location of [redacted]"

- (S/NF/SG/LIMDIS) Source A:

-- The target [redacted] is located in a dry SG1A warm climate foreign region. He is in the vicinity of a tall beige or sand colored building, which is a hotel or "Holiday Inn" near a water front area that has dark rocky embankments. Dark circular objects are in the water at this location. There are elaborate ornate cultural objects around him which are middle eastern in origin. He is currently located in Greece or surrounding territories. He hangs around a younger man who wears a dark thin trimmed beard who is like a son or family to him, although I do not believe they are related.

- (S/NF/SG/LIMDIS) Source B:

-- The target individual is currently in an area where there are a series of small islands. This area is famous for metal and stone sculptures of humans rendered in Greek/Roman style. However, I do not sense that the target is currently in the Mediterranean. He is fond of French cooking; it feels as if his current location is a place where a lot of French culture has at some point been predominate here. I want to say the Caribbean but this location feels much more isolated and restricted than the Caribbean.

-- The main characteristic of this group of islands is that they are all fairly small and clustered very close together. The sands here are white but extremely powdery looking. Access is only by small boat (the water feels very shallow here). Each individual island has no more than two to five separate habitations or residences on them. These are not estates (the islands just aren't that big) but they do feel exotic: private
