**(continuation of Projects 94-267-0 and 94-268-0)**

(S/NF/SG/LIMDIS) Following are the perceived highlights SG1A□  
from each source. Question to source was: If target is [REDACTED]  
[REDACTED] provide and describe identification features.

SG1A

- (S/NF/SG/LIMDIS) Source A:

-- No new data.

- (S/NF/SG/LIMDIS) Source B:

-- The target aircraft in question feels very large; huge, in fact much thicker than the average 727. It does have three engines; all three originally perceived to be located in the rear. However, further investigation places only one in the rear; each wing contains a very large, circular engine. It feels more cargo-oriented vs. strictly passenger.

-- The fuselage of this aircraft is large and round. It has a large, rounded belly section; large enough to hold whole containers. There is something different about its configuration; the nose seems different; it is longer or angled down more.

-- It has a white under belly. There is a colored stripe (maybe blue) separating the white under belly from the silvery top; this stripe runs almost the entire length of the aircraft. I also sense that there is a reddish-brown color present somewhere on the aircraft as well. The tail is colored differently with a dark color (blue?) topping the rudder section (sketch A).

-- The perception is that this aircraft is leased to a foreign government or company but is owned by a major U.S. carrier. [NOTE: I kept getting A A (American Airlines?); however, in light of the previous perception, this makes no sense at all to me.]

-- The alpha numerics perceived were: 7047 and LB 0347. My sense is that the 4 and 7 are definites.

-- There is a three-pronged or rayed design element or emblem located high on the tail rudder (sketch A). It's composition is similar to that perceived during the previous project.

- (S/NF/SG/LIMDIS) Source C:

-- Target is the same aircraft as described in earlier reports. During this session, I could see men on a large vessel moving around boxes or crates.
