S-28,118/PAG-TA

DATE: 3 December 1993

REPLY TO
ATTN OF: PAG-TA

SUBJECT: Feedback on STAR GATE Projects 93-210-0 and 93-212-0 (S)

THRU: PAG [redacted] PA [redacted]
TO: PC [redacted]

- Refs: a. Letter, PAG-TA, S-28-103/PAG-TA, 29 Oct 93, STAR GATE Project (93-210-0) (S) (enclosure 1)
- b. Letter, PAG-TA, S-28-107/PAG-TA, 5 Nov 93, STAR GATE Project (93-212-0) (S) (enclosure 2)

SG1A
SG1A

1. (S/NF/SG/LIMDIS) On 20 October 1993, Chief, PAG-TA, briefed the Commander, Deputy for Operations and other U.S. Army Foreign intelligence Command (USAFIC) personnel on this Activity's mission and functions. One outcome of the briefing was a USAFIC tasking to provide information on a vessel known as the [redacted]. Enclosures 1 and 2 provided the USAFIC with results of our attempt to provide data regarding the [redacted]. A copy of the tasking sheet prepared by PAG-TA is at enclosure 3 for Project 93-210-0. A self-initiated PAG-TA tasker for follow-on Project 93-212-0 is at enclosure 4. At enclosures 5 and 6 are project evaluation feedback results for both projects which were received from USAFIC on 30 November 1993.

SG1A

2. (S/NF/SG/LIMDIS) As background, I was shown photographs of the [redacted] and also provided with verbal feedback as to how well our operational personnel had done on 8 November 1993. The tasking from the USAFIC was also a "test case" in order for us to establish our "bona fides". Overall, we did very well and the USAFIC was pleased by the outcome. With the disestablishment of the USAFIC on 1 December 1993 and the impending transfer of U.S. Army HUMINT trained military personnel and civilians to the DIA to man the Defense HUMINT

DECLASSIFY ON OADR

Level 3

This document is made available through the declassification efforts
and research of John Greenewald, Jr., creator of:

The Black Vault

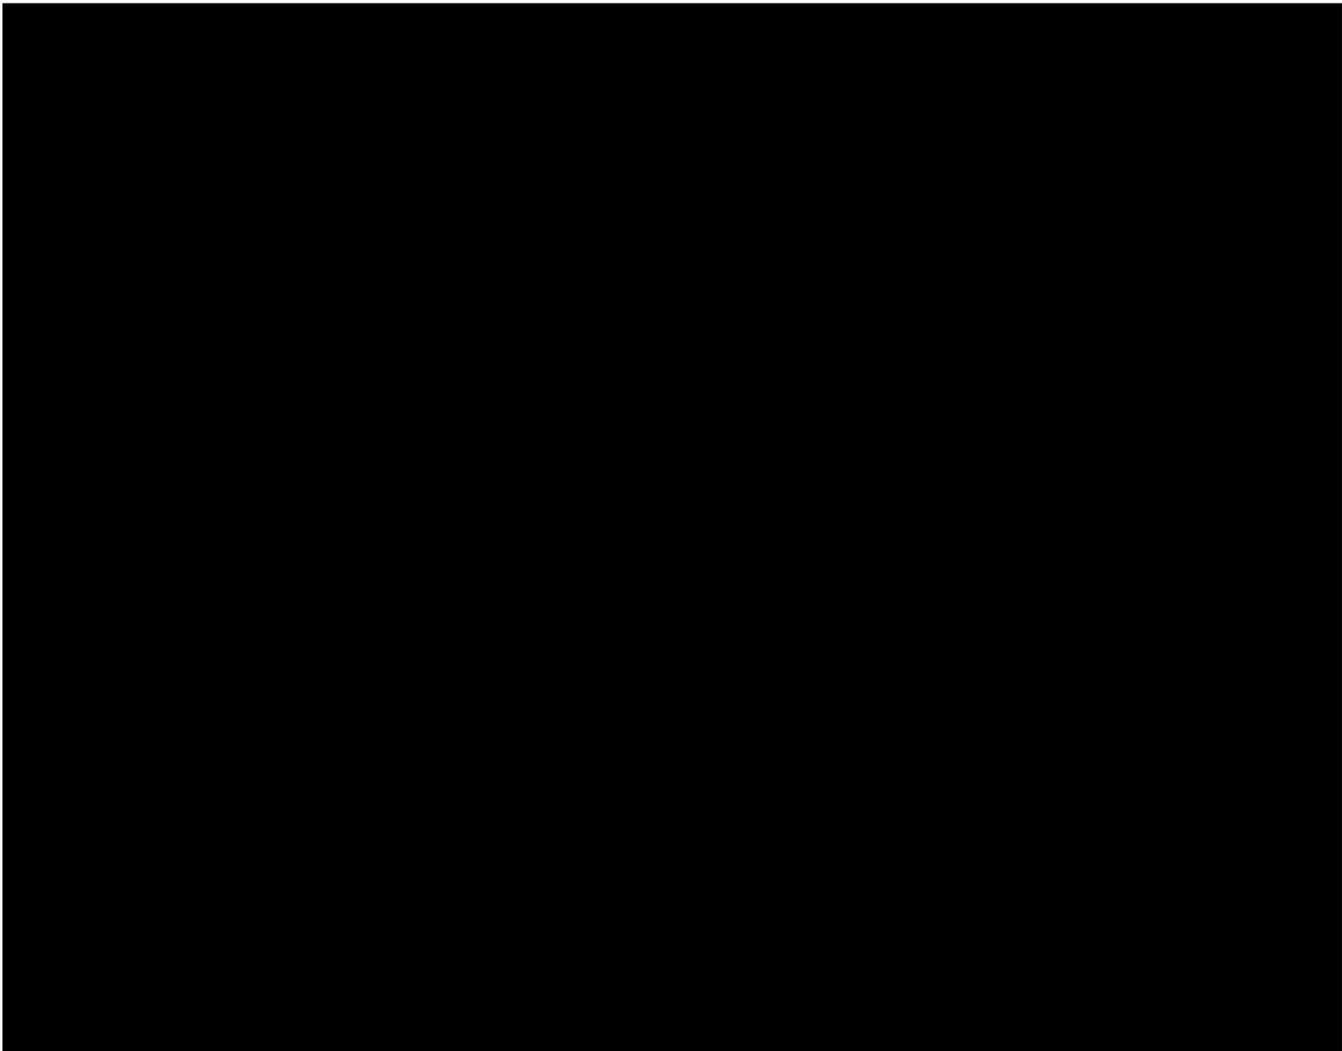

The Black Vault is the largest online Freedom of Information Act (FOIA) document clearinghouse in the world. The research efforts here are responsible for the declassification of hundreds of thousands of pages released by the U.S. Government & Military.

Discover the Truth at: <http://www.theblackvault.com>

Service, it could very well be that this Activity will not receive any further taskings. We are, however, making arrangements to brief the Commander of the USAFIA, a former subordinate element of the USAFIC, at Fort Meade, MD.

3. (S/NF/SG/LIMDIS) Project 93-210-0 Feedback (enclosure 5) is a follows:

SG1A

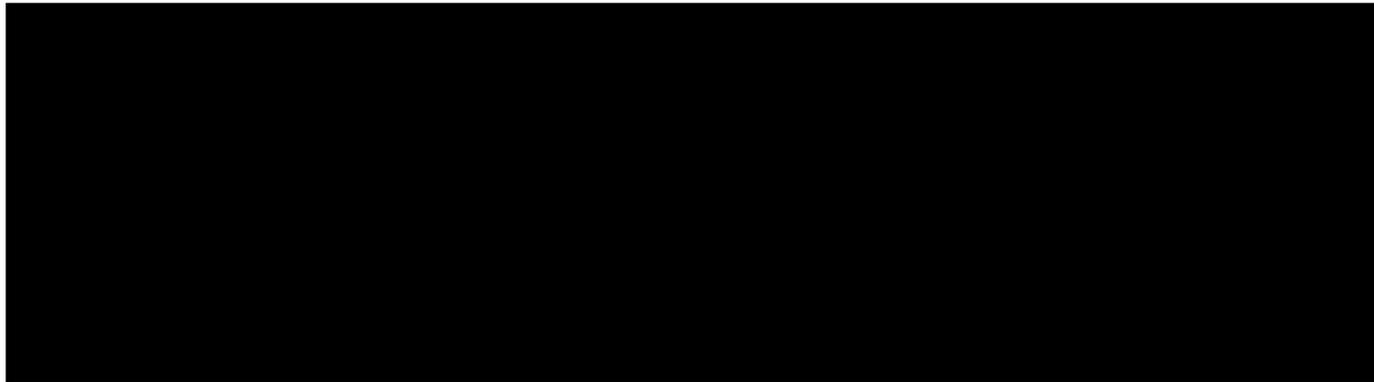

REPRODUCTION REQUIRES
APPROVAL OF ORIGINATOR

SECRET

5. (S/NF/SG/LIMDIS) In sum, this USAFIC directed requirement was perceived to be an excellent training exercise for Activity personnel. Especially germane was the timeliness of the feedback. More importantly, we have now established our credibility with the former USAFIC and, hopefully, with its successor organization. One step in our effort to build our customer base.

interior of the vessel. An object is lifted straight up and out of the vessel's interior; then it stops and changes angle once it is above the smallest opening (see enclosure 1c).

-- This structure is associated with directed energetics of some sort. Large, circular fields or rings of energy are projected out at an extremely fast rate from the smallest opening. They are reminiscent of "visible light" rings of donut-shaped white energy. Enclosures 1e-1g, depict an angle apparatus which telescopes up out of the interior of the vessel and then spreads out.

-- The diagram at (enclosure 1g) depicts what is formed by the structure on the vessel. It is perceived to be some sort of energy "ring" that is formed around the vessel. The radius is in the tens or hundreds of miles range (60 and 100) are important for some reason. This ring, perceptually forms a white "fog", "noise" or "mist" around the vessel. It creates an inference which blocks something. The energetics are perceived to pulsate back and forth; it creates an interference but also "senses" at the same time.

-- There are a number of long, black tubes or cylinders wrapped in green and stacked width-wise within the hold area. They are stacked in groups of three with the upper tube having a larger diameter than the two lower tubes. These tubes are perceived to be "components" of some kind of "system". These tubes or cylinders are moved from a horizontal orientation to that of a vertical one. Then they are placed within a larger, hollow tube and lifted upwards.

-- Other concepts associated with the general target but not necessarily related to one another are:

- Someone is perceived saying "You're hurtin me. Your hurting me".
- The smell of dried fish or squid and "birds singing".
- Some sort of relationship to the term "Syrian".
- The smell of oil.
- A spring-like object slowing uncoiling and recoiling (enclosure 1a).

NOT RELEASABLE TO FOREIGN NATIONALS

STAR GATE

SECRET

DATA SUMMARIES

(S/NF/SG/LIMDIS) Following are perceived highlights from each source. The period covered is 22, 25 and 26 October 1993.

- (S/NF/SG/LIMDIS) Source A:

SG1A

-- The target vessel known as the [REDACTED] is located off the coast of a sandy beach or sandy area with rocks. Foreign black haired men with dark eyes are somehow associated with this vessel. The people who are native to the area where the vessel is located are like savages.

-- The vessel has explosives aboard and a long thin golden line emanating from the vessel indicates radar capabilities. These explosives can cause considerable damage to areas including fire on impact. Intelligence related activities may be monitored from the air.

- (S/NF/SG/LIMDIS) Source B:

SG1A

-- The target vessel [REDACTED] is located off of the east coast of a land mass within the band between the equator and the Tropic of Capricorn. This vessel is much faster than others of a similar type. It is perceived that there is a possible "military" configuration within the vessel although its exterior has the appearance of a commercial cargo vessel. If in fact, [REDACTED] is the true name of the vessel, its aka name includes the letters "...ANTA" and "MY.....". The bow of this vessel angles up more than the normal for a similar ship.

SG1A

-- There is a very unfamiliar circular or ovoid structure situated mid deck on this vessel (see enclosures 1b(2), 1c, 1d(1) and 1g). It has three levels exposed above the deck and a hollow tube which penetrates down into the

SECRET

NOT RELEASABLE TO FOREIGN NATIONALS

- A fire.
- A male with long, black hair who occupies an important role in the operation of this vessel.
- A truncated object which "pops up"; this action is reminiscent of a submarine's "con tower" breaking the surface of the water.
- An object with "twin barrels".

- (S/NF/SG/LIMDIS) Source C:

-- The vessel has armaments that are on board which are thick and tubular with points at one end (see enclosure 1h). These objects look like small missiles. The armaments are either enclosed, encased, or secured. They can be opened up with an automatic motion. The armaments are perceived to be white or silver and shiny in color.

-- It is perceived that the vessel has the capability to "see" at very long range. A light can surround a very large area and "see" out at long distance. It cannot be determined at this time if this capability is with the vessel itself or if it is an independent object or thing (something like radar) that is associated with the vessel. It is perceived that the vessel has powerful armaments to protect itself.

-- People associated with the vessel [REDACTED] are dark skinned.

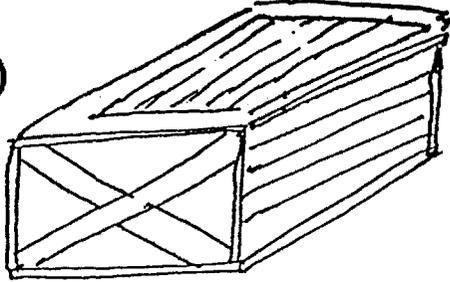

SG1A

-- Terrorism and/or insurgency related activities are associated with this vessel.

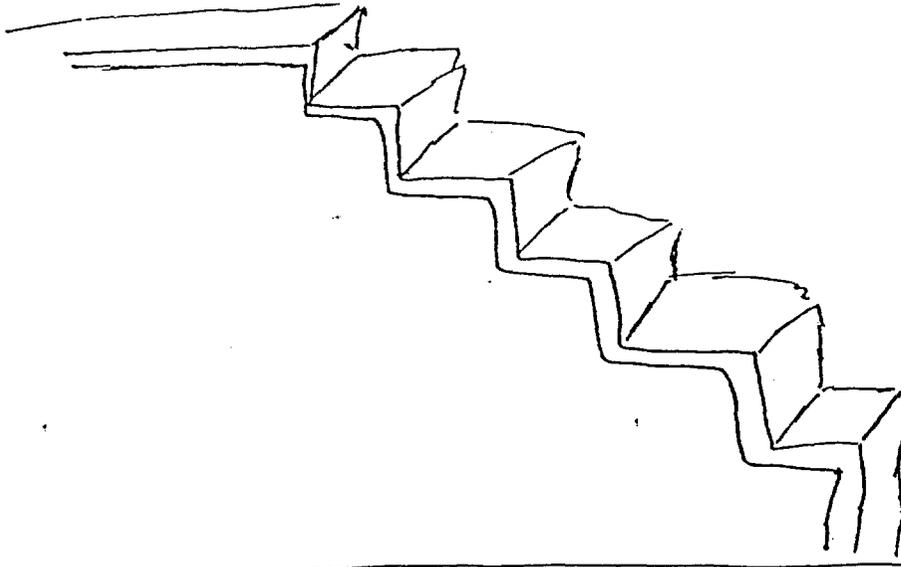

-- Small aircraft are somehow associated with the scenario.

DATA SUMMARIES

(S/NF/SG/LIMDIS) Following are perceived highlights from each source. The period covered is 29 October - 2 November 1993.

- (S/NF/SG/LIMDIS) Source A:

-- The vessel is in a very warm climate and is geographically located in the south. Route of travel includes a west, southwestern direction. Dark skinned people are associated with this vessel.

-- The cargo consists of destructive weaponry. The armaments are long and linear in design with destructive agents, which may cause an orange fire. The vessel is elusive and long with one mast that has the color gray on it. Four men and an element of inactivity are directly associated with this vessel.

- (S/NF/SG/LIMDIS) Source B:

-- The ship's ultimate course is in a northerly direction. It is currently stopped near a point of land that is extremely rocky and jagged. This promontory extends out into the water and forms small, isolated precipices reminiscent of an island chain, only on a minuter scale.

- (S/NF/SG/LIMDIS) Source C:

-- The target vessel is white in color. The vessel has a complex communications system on board. The vessel is currently sailing northeast of its original destination. The vessel can be considered a medium sized vessel. The vessel is in communications with a radio tower. A military activity or mission is associated with the vessel. There is a circular object in the front of the vessel.
