

SESSION INFORMATION

- A. TARGET DATA:
 Task/Target No. : 94-235-0
 Session No. : 01
- B. PERSONNEL DATA:
 Source No. : 049
 Monitor's No. : NA
 Beacon/Sender No. : NA
- C. SESSION DATA:
 Date Task Received : 18 APR 94
 Session Date : 19 APR 94
 Start Time : 0938
 Stop Time : 1036
 Method Used : CRV
 Distractions (PIs) : Massive headache
 Pre-session Hunches (AVs) : JTF-5 stuff; codeword(s)
 Date Summary Returned : 19 APR 94
- D. EVALUATION DATA:
 Viewer's Estimate :
 Evaluator's Estimate :
- E. SESSION SUMMARY:

SG1A The term [] refers to a location. The activity associated with [] has been given a window by the planners of 7 to 10 days to take place. This will occur between April 25 and May 6. However, an extreme natural process or phenomenon will interfere with the development and evolution of [] SG1A

Whatever is being dealt with, it will be brought into this location by air and will be taken away by air.

SG1A [] is a location within an area of extensive sand dunes. This dunes, however, do not occur with what is normally considered a desert environment; they are an anomaly for the area. This location used to be commercially exploited but is no longer viable. This commercial activity was associated with the concept of a "sand mining" or "sand processing" activity.

SG1A Specifically, [] is located on the back side of the sand dunes. It is hidden from a large, developed area (i.e. city) which can be seen in the distance.

This location contains a hard, narrow "L"-shaped feature reminiscent of a small landing strip. This landing strip appears to disappear right into the dunes. However, the foot portion of the "L" runs in front of a large, open structure. This structure feels like an abandoned warehouse or storage facility. It is constructed of blocks reminiscent of cement or poured concrete.

This document is made available through the declassification efforts
and research of John Greenewald, Jr., creator of:

The Black Vault

The Black Vault is the largest online Freedom of Information Act (FOIA) document clearinghouse in the world. The research efforts here are responsible for the declassification of hundreds of thousands of pages released by the U.S. Government & Military.

Discover the Truth at: <http://www.theblackvault.com>

There is a second structure present. It is tall, squarish and constructed of wood. The exterior is faded and it appears very weathered.

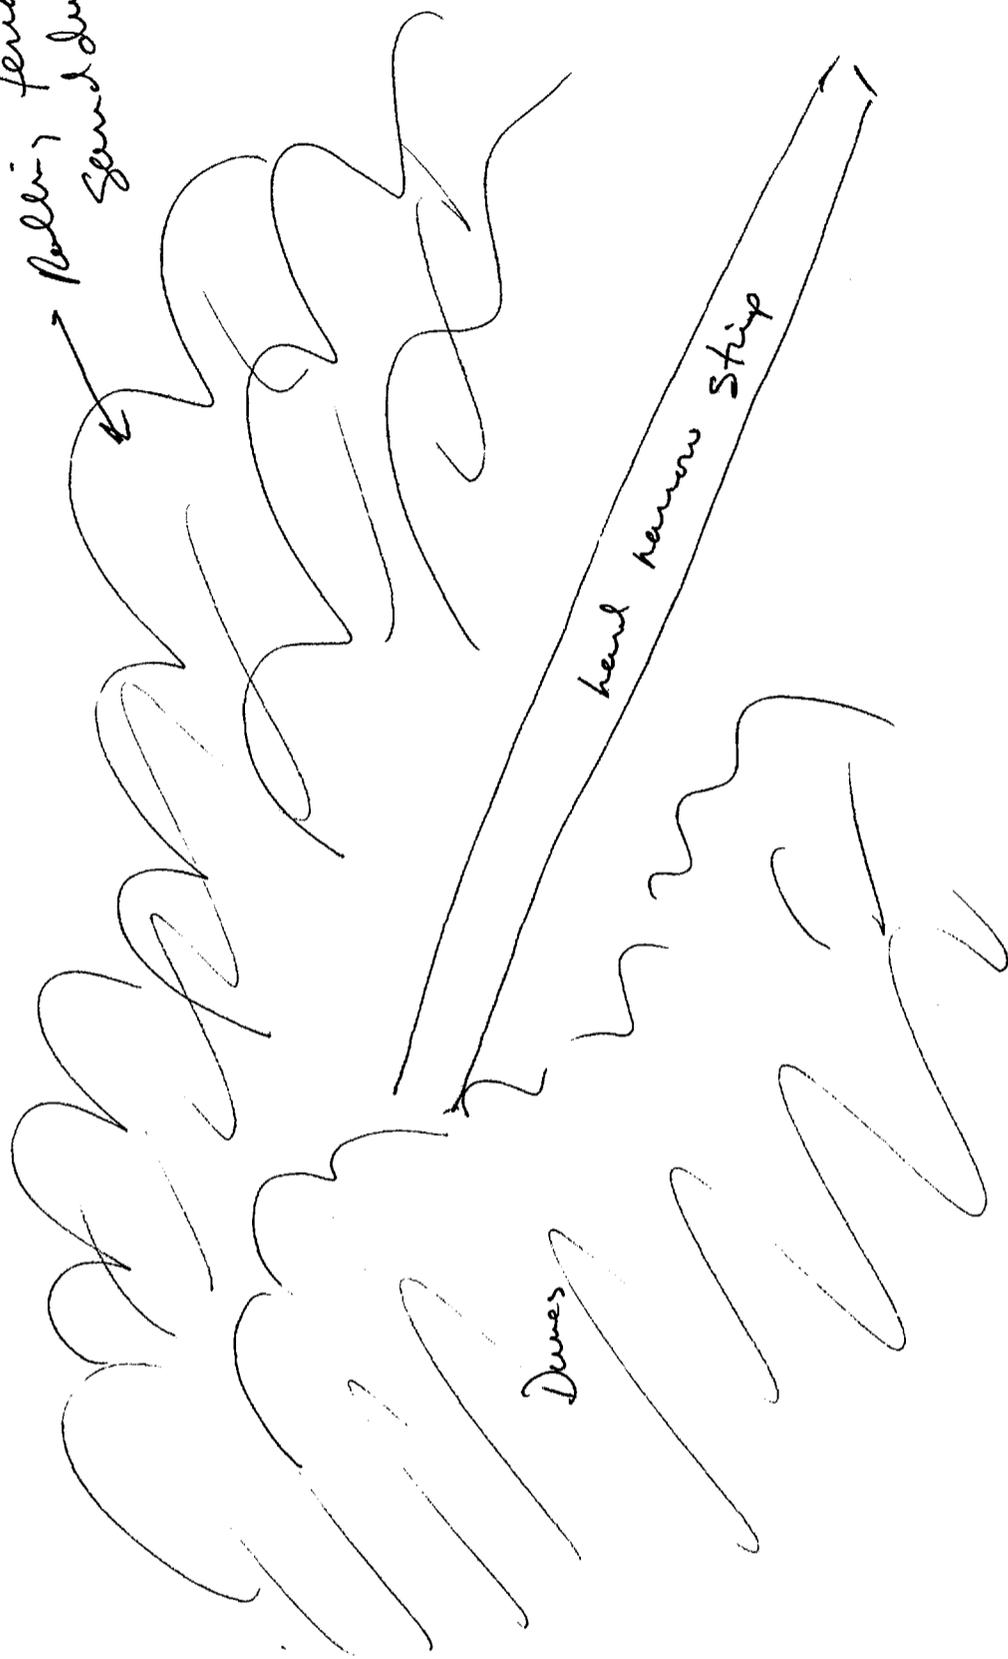

The faint outline of a road or trail may be perceived leading away from the larger structure. It may have once been a well used access but is now covered over by sand. It is very hard to perceive.

There are several sets of large power lines and a large suspension bridge associated with the developed area in the distance. There is a mountain range which separates this "city" from a body of water reminiscent of an ocean. The mountains in this particular vicinity are famous for a lot of fog.

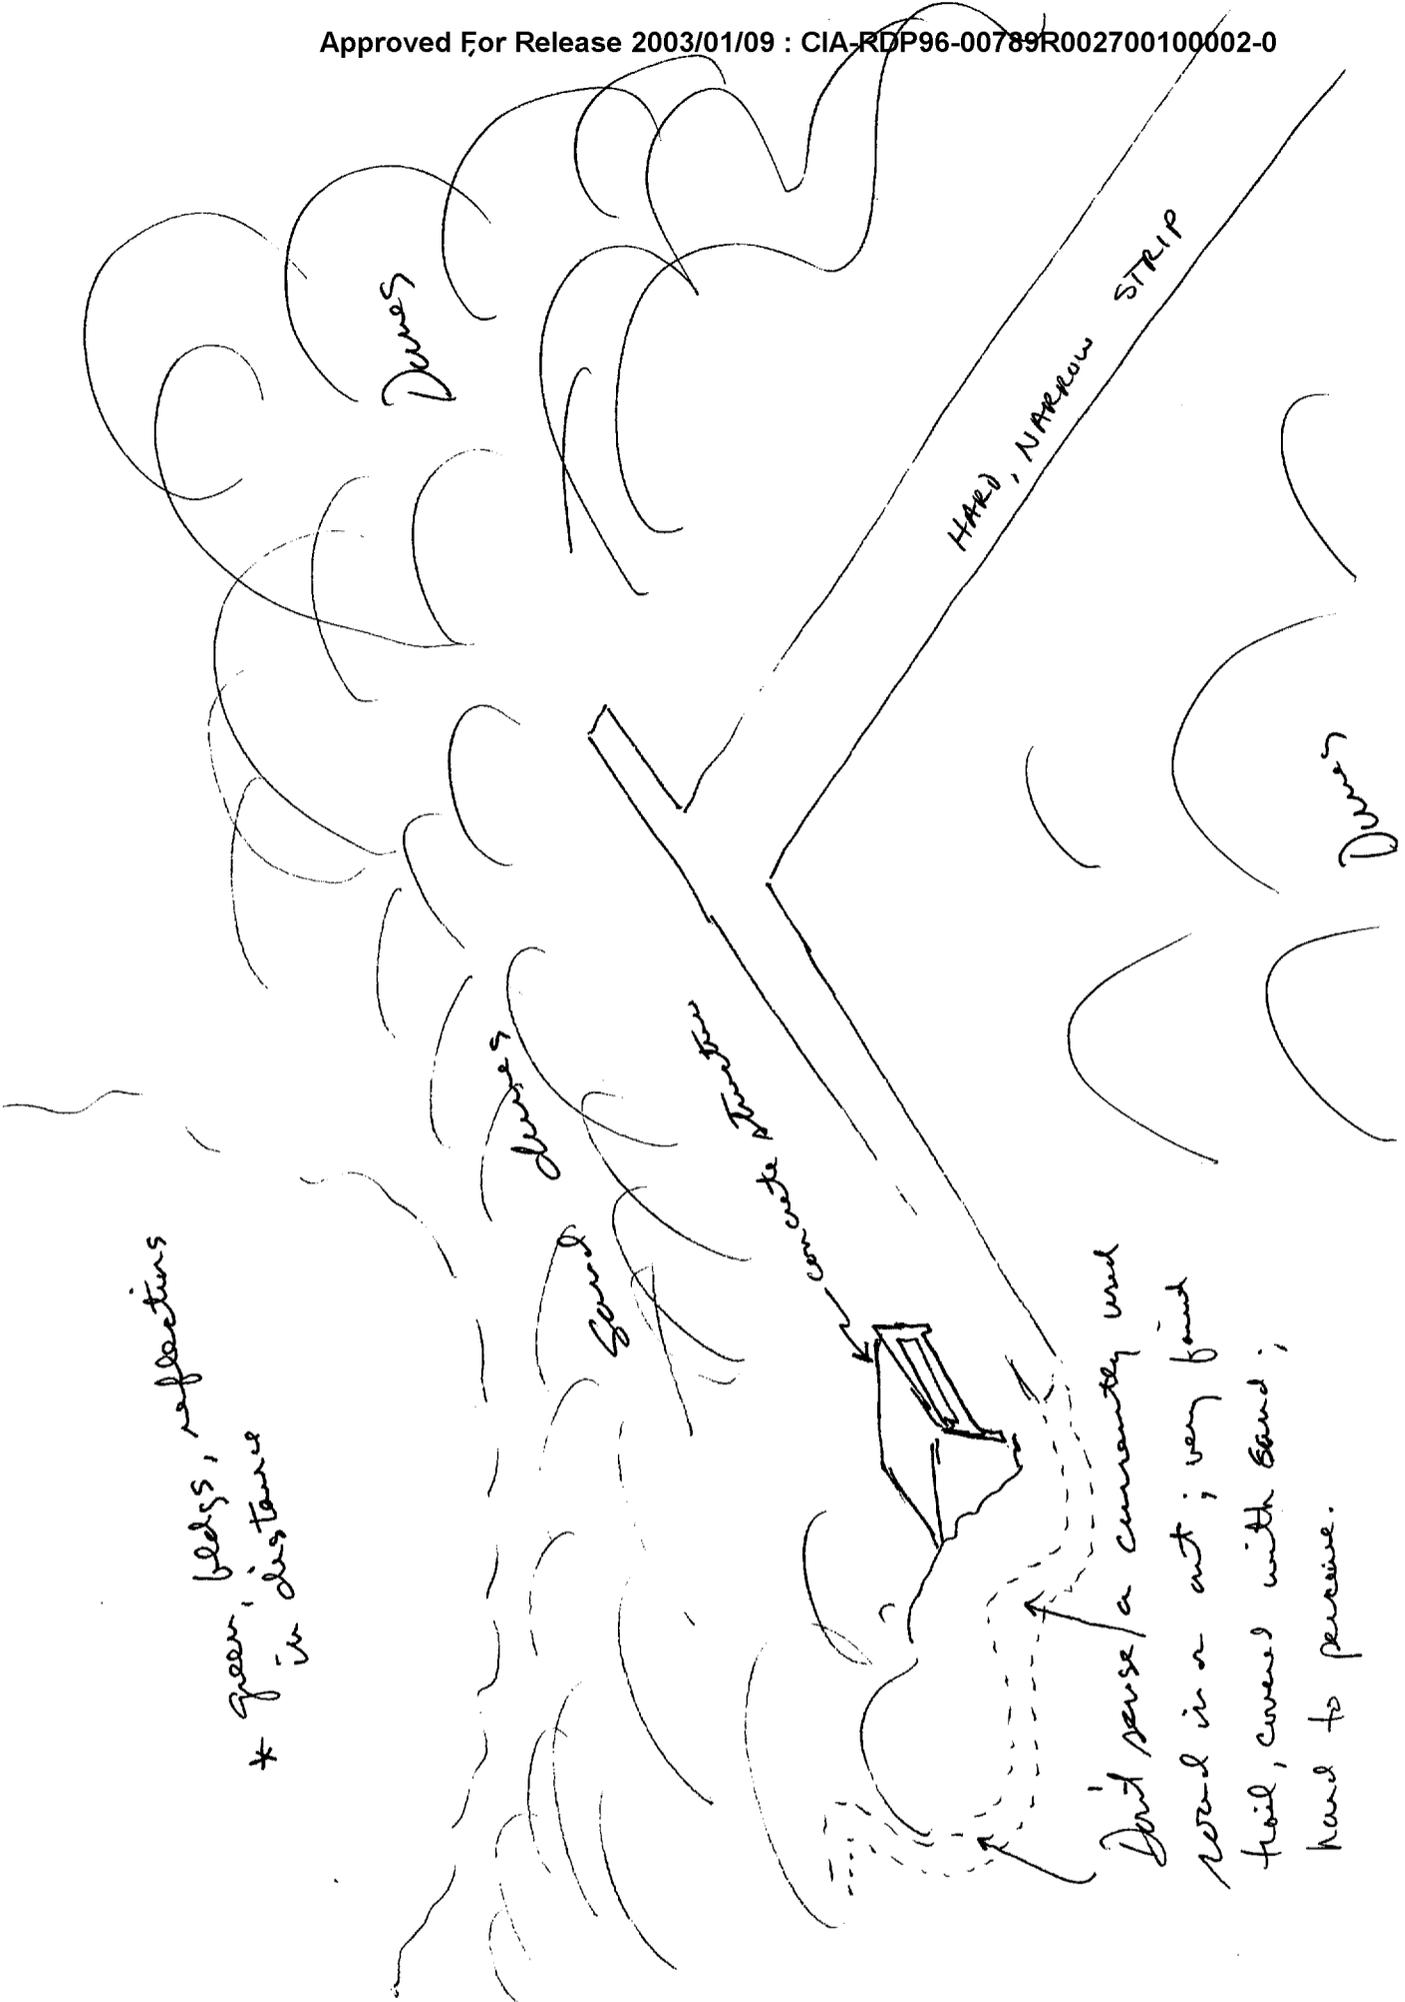

The terms "FLAT TOP" and "POT LID" were perceived as associated with this target.

A cement reinforced trough-shape hole has been tunneled into the dunes.

Rollin, fernin; like
sand dunes

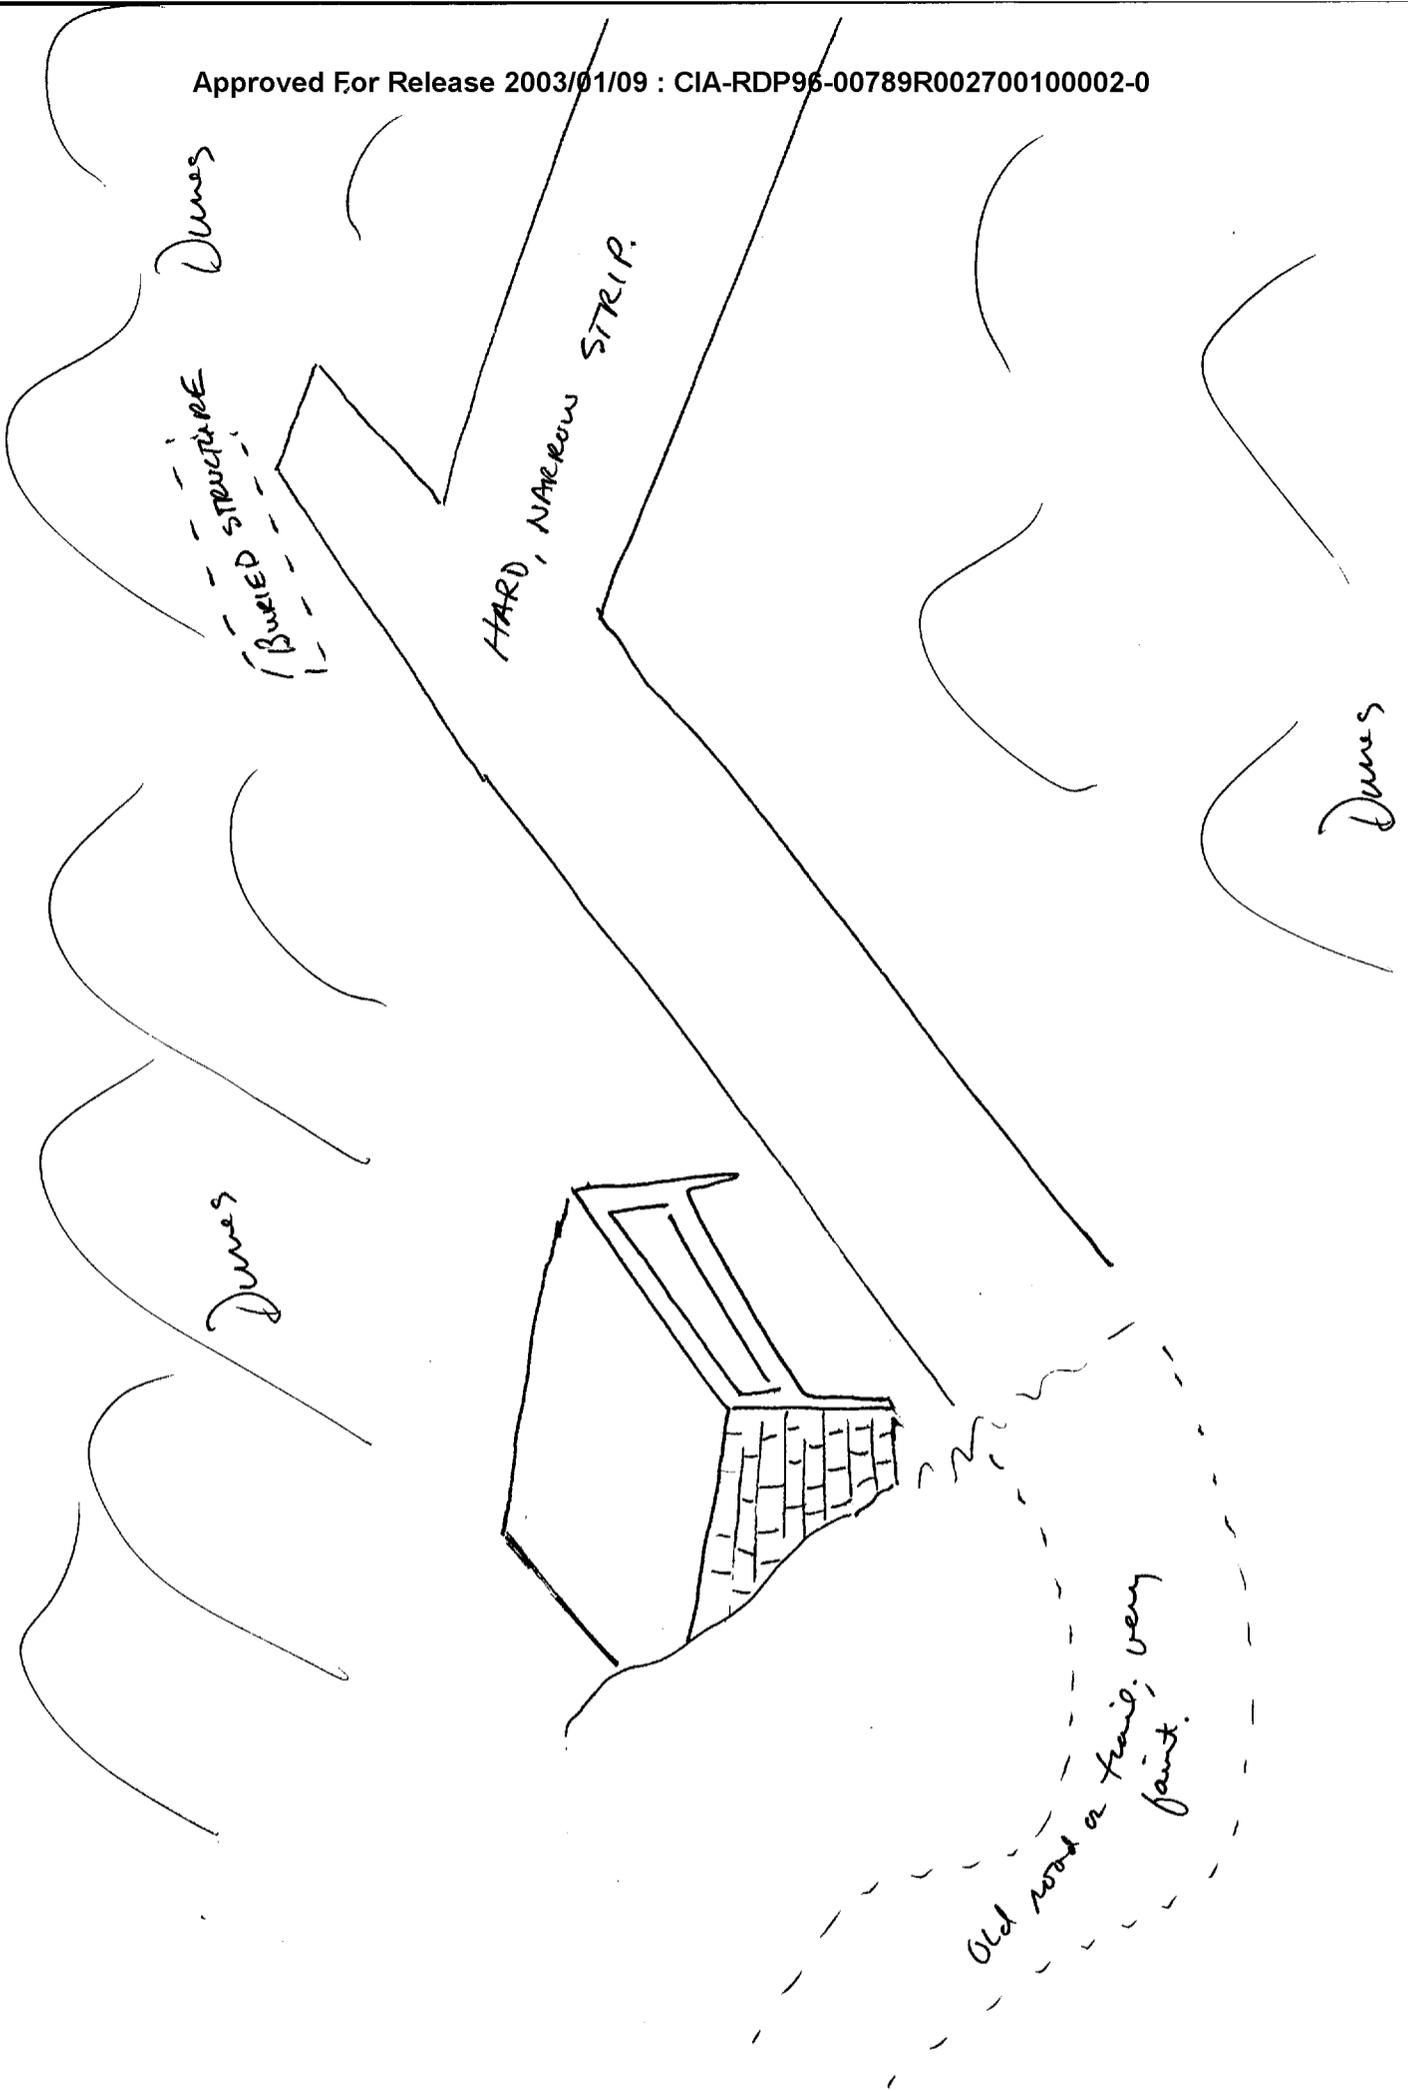

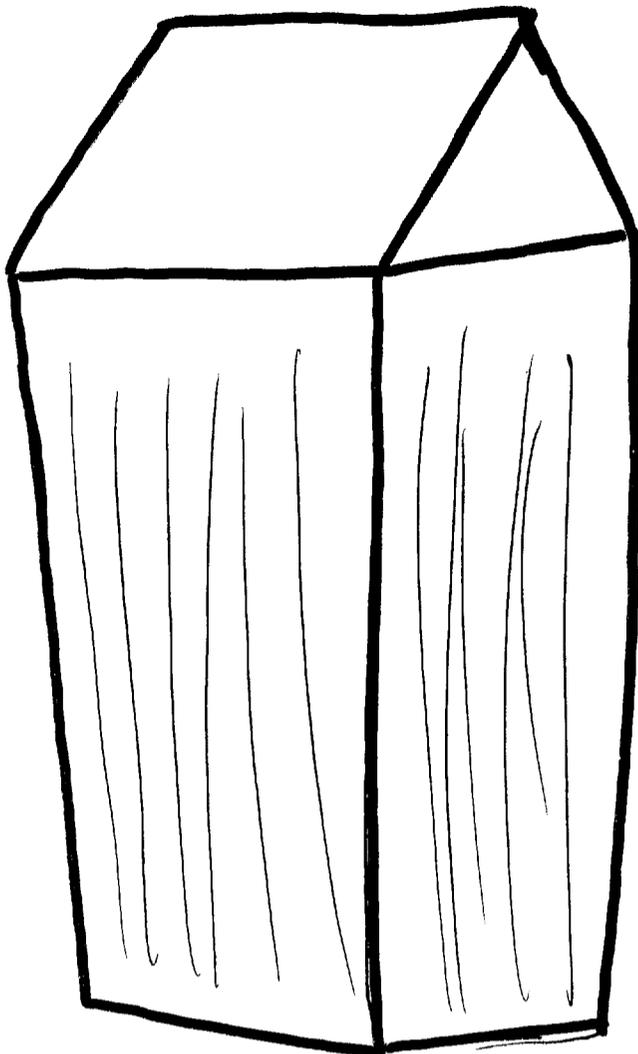

View from a distance

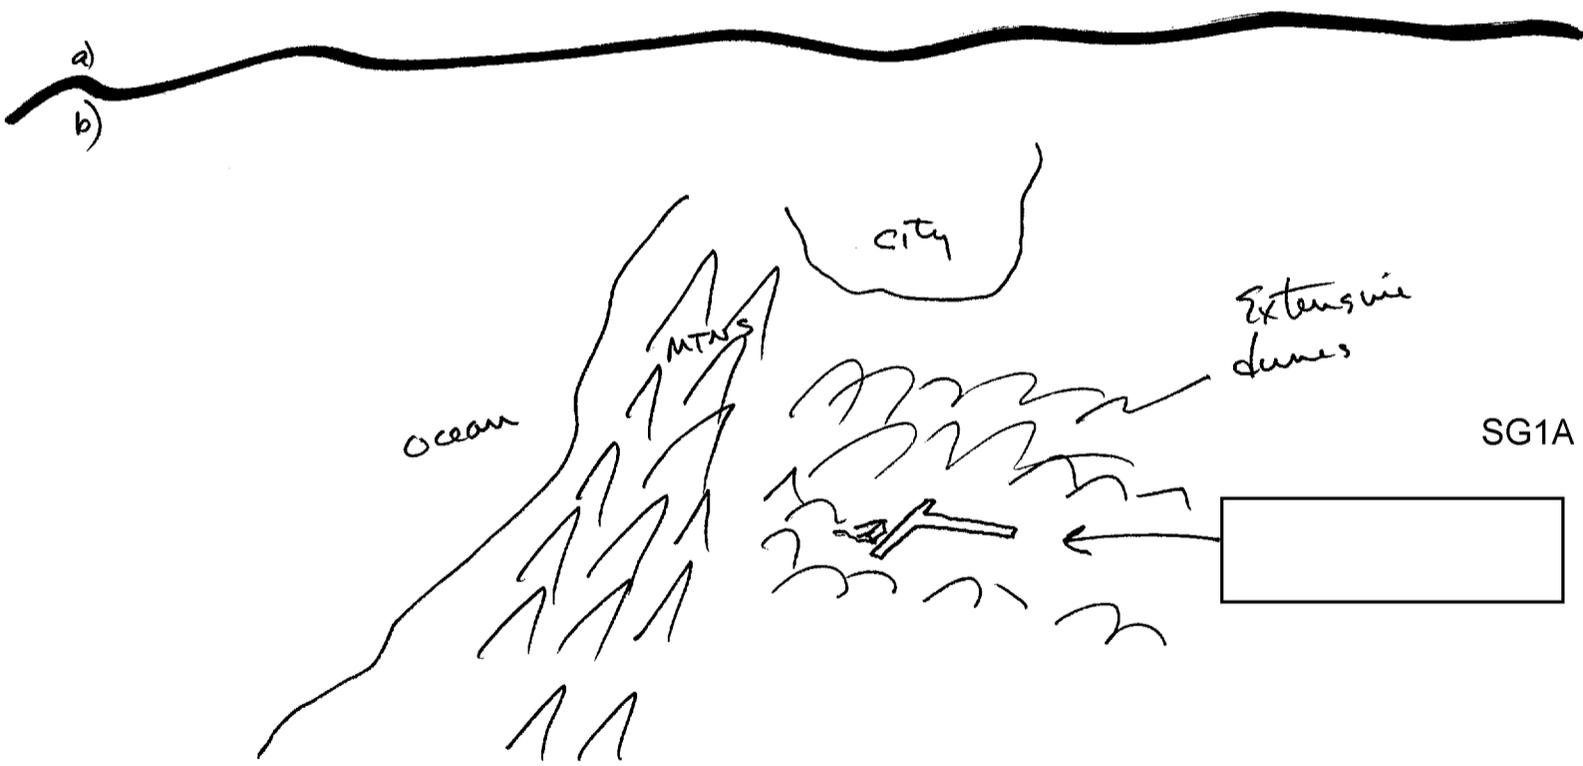

* green, bldgs, reflectors in distance

Don't see a currently used road in or out; very faint trail, covered with sand; hard to perceive.

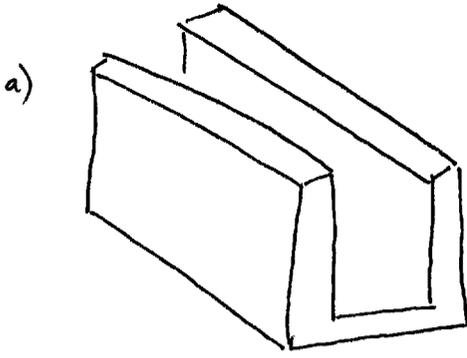

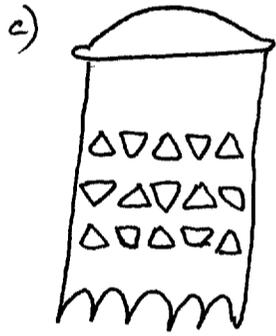

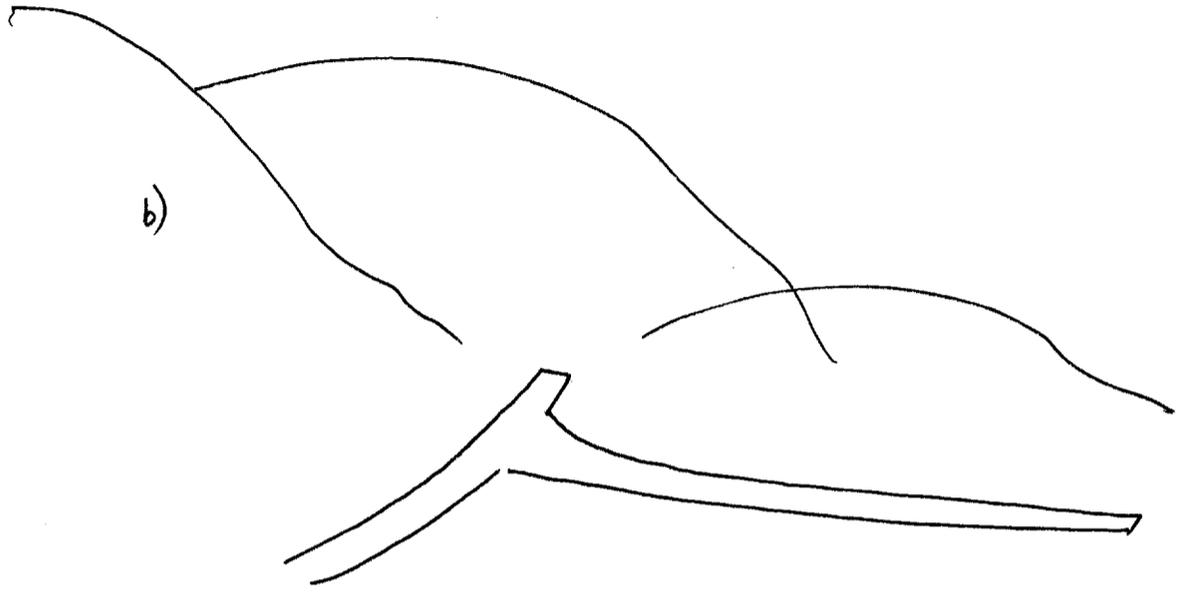

Tall, wooden structure;
wood exterior; looks
old, faded, aged.
Associated with concept
of "sand mining" or
"sand processing"
activity.

SG1A

- hard, squared off, trough
like feature
- deep; feels partially
~~buried~~ buried

- unknown object
