SECRET

(U) PREFACE:

(S/NF/SG/LIMDIS) The Special Activity Report is part of on-going taskings in response to a request from [redacted]

SG1H

[redacted] The information provided in this report was generated by PAG-TA employing remote viewing (RV) methodologies.

(S/NF/SG/LIMDIS) The data provided in this project concentrated on a target viewed by a beacon person. The results were forwarded to [redacted] via secure fax. The [redacted] evaluation feedback is at Appendix B.

SG1H

(S/NF/SG/LIMDIS) The methodology used in this activity is exploratory. Results should not be considered as stand-alone; but used or evaluated in conjunction with other proven data sources (HUMINT, SIGINT, IMAGERY, OPEN SOURCE, and/or MASINT). Generic data (e.g., general shapes) are more reliable than specific data (e.g. dimensions, names).

DATA SUMMARIES

(S/NF/SG/LIMDIS) Following are the perceived highlights from each source.

- (S/NF/SG/LIMDIS) Source A:

-- The target site has a big, tall, and thin almost pyramid type shaped structure. It is off-white in color and situated on open grass land. Lights are present. Black asphalt and concrete can be found around the base as walkways for people (sketch 3a)

-- There is a small body of water nearby where there are swans or ducks swimming (sketch 3b). This site is recreational for people and yet is a historical landmark. The target is located in the cultural seat of the city, which has fine architecture and well kept vegetation. This site is entertaining for people in that they come to see, visit, and tour a historical heritage and the things erected in people's honor. Food and entertainment are available in the area. Colored fountains or fireworks are at times displayed around the site. The target site draws large numbers of people and tourists.

- (S/NF/SG/LIMDIS) Source B:

-- The target site consists of a fenced-in enclosure with one side partially obscured. There are areas which are overgrown and uncleared of vegetation reminiscent of weeds and vines. There is stuff piled up throughout the area. The target feels seemingly unkept.

SECRET

-- There are concentrations of rusty metal, boxes with one end open, grating and a sharp, piercing smell. Concepts associated with the target are: heat; smoke; spinning water; movement like treaded vehicles; parallel marks reminiscent of scrape marks in the sides of a large, squarish hole in the ground; rubber and series of uniform "humps" (sketch 3c).

-- There is a low building which feels empty and unoccupied (sketch 3d). It has a low, wide opening or entrance on one side. The walls consist of concrete or brick. There are no windows. The side is a light color and its appearance is reminiscent of white paint which has peeled. There is a high wall which abuts along one side of the low structure and towers over my head. Other associated features are depicted in the sketch on (sketch 3d).

-- One of the strongest impressions of this target is a square-shaped hole or compartment with a "lid" which opens and closes (sketch 3e). When closed, the "lid" is even with the ground surface.

-- Other objects associated with this target are depicted on (sketch 3c):

- a) A series of uniform "humps" or rolls.
- b) A squared, unidentified feature.
- c) A series of cone-shaped objects attached in a row; reminiscent of a bank of lights.
- d) 2 or 3 stacks of long metal rods, tubes or pipes; these sit behind a low wall or wooden barrier.
- e) A "layered" roll.
- f) A stack of rectangular sheets of thick material reminiscent of wood.

-- Additional concepts and/or objects present at the target are:

- something like an old laundry or mail cart.
- large, circular metal objects reminiscent of conduits or tanks (sketch 3d).

--- combustion.

--- machinery.

- (S/NF/SG/LIMDIS) Source C:

-- I sensed that when the beacon person left his destination, he made a sharp turn right (sketches 3f & g). At first I could see a large white decorative object (sketch 3h). I had to look up to see this and I don't think that this object was sitting on the ground. It may be sitting on a base or foundation of some type. When I kept looking at this object, it seemed that the bottom was similar to the top. This object may be reflecting itself, maybe from water (sketch 3i). This object was outside. I also saw a plane flying in the air and then later on during the session I had the feeling of a lot of planes (sketch 3j). (Beacon person could have been near an airport).

-- The site was a large flat area or square that was man-made. This flat square was white or beige in color and it was outside (sketch 3k). This area reminded me of an historical site and it may have been set in a park type setting. There was a large object sitting in this area that looked like a statue of a man riding a horse. This statue was dark in color. To the side of this flat monument was a very large square structure that was quite colorful.

-- The large square structure reminded me of a Greek building (sketch 3l). This structure could have been built based on the Greek history.

-- I then felt that I was inside a very large building and the theme was history and art. It was very colorful inside and I could see a lot of gold. It was very pleasant and one can come here to enjoy themselves. (The art and history looked like Egyptian).

- (S/NF/SG/LIMDIS) Control Person:

-- The target is a house or condo. There seems to be a room, a bedroom with pretty flowered wallpaper in pinks and rose color. The ceiling has a ceiling fan or ornate fixture. There are shrinks or wardrobes in different rooms and hallways. The stair case goes downward and splits. People tour this building; however, it is still a home. There are a lot of trees around as you approach the target (sketch 3m).

IMAGE MESSAGE TRANSMISSION

DATE: 931117

TIME: 0900-0930

DAY : WEDNESDAY

LOCATION: EGLIN AIRFORCE BASE FLORIDA

WEATHER: 65 degs, light winds, scattered clouds

CONDITIONS: Quiet Country dirt road

PHOTOGRAPHS: Two Photos were taken

SUBJECT: A dirt road with light red colored sand. Dirt road running North East and curved to South slightly uphill. Both sides of road had light under brush with pine trees approximately 20' - 30' tall. My location was at the curve on the west side of road concentrating on road from North East around curve to South.
