(U) PREFACE:

(S/NF/SG/LIMDIS) The Special Activity Report is part of on-going taskings [redacted]

SG1H

SG1H

[redacted] The information provided in this report was generated by PAG-1A employing remote viewing (RV) methodologies.

SG1H

SG1H

SG1H

(S/NF/SG/LIMDIS) The data provided in this project concentrated on a target viewed by a beacon person. The results were forwarded to [redacted] via secure fax on 15 June 1994. The [redacted] evaluation feedback is at Appendix B.

SG1H

(S/NF/SG/LIMDIS) The methodology used in this activity is exploratory. Results should not be considered as stand-alone; but used or evaluated in conjunction with other proven data sources (HUMINT, SIGINT, IMAGERY, OPEN SOURCE, and/or MASINT). Generic data (e.g., general shapes) are more reliable than specific data (e.g. dimensions, names).

SPECIAL ACTIVITY REPORT
PROJECT NO. 94-244-0

(U) DATA SUMMARIES:

(S/NF/SG/LIMDIS) Following are the perceived highlights from each source.

- (S/NF/SG/LIMDIS) Source A:

-- The target site is at a land water interface location. There is high, dry, arid, and rough or rugged terrain and cavern like areas constructed of old stone in a hot climate. Planes are near this location. A semi-circular object shaped like an umbrella exists with a hole in the center or top (skyward) which reveals light or sunlight and has long extensions, possibly consisting of a type of rope. Please refer to the attached sketch (sketch a). Something or someone moves from a high to a low position. Hands of a man move downward over a rope extension from the high point to the low point. There is a sudden impact. I am under the impression that this activity could be used for a type of search or rescue mission and it is an adventurous experience which can be very exciting or exhilarating. Communications are included in this scenario. The letter "Q" and the name Louis Armstrong came to mind, who invented frequency modulation defined as electronics or radio. In summary, someone goes through a large hole, possibly out of an airplane and perhaps parachutes to the surface.

-- Directly following this session, I discovered that men at Utah Beach in Normandy had parachuted this morning from planes off the cliffs onto the American cemetery below, one of them injured his back. The target reminds me of this type of activity and I hope I have not confused "today's imagery.

- (S/NF/SG/LIMDIS) Source B:

-- The target is a location know for its geological and/or topographical characteristics. It is something that is

"in the ground" and has a name associated with earth, or earth-related processes. This is an old place; it feels old (sketch b).

-- There is weathered and stained sandstone (natural and shaped into building blocks). There are oddly shaped rock, stone or cement figures scattered around (sketch c). Portions/features at the target locations appear at times to be almost a reverse image i.e., like an x-ray .

-- There is an abundance of exposed rock; flat surface which are jagged and not smooth, reminiscent of a cut bank or cliff face.

-- There are odd images i.e. odd curves, swirls and angles. It's appearance is almost surrealistic. There is a zig-zag ladder or walk way which extends for a great distance (like the ladder on a fire tower or apartment building (sketch b)).

-- There are stacks of similarly shaped objects; squares with criss-crosses on the sides. There is a series of wooden posts or pilings (sketch d).

-- The vegetation here is very coarse and heavy, i.e. shrubs vs. grass, etc. A band is playing nearby and people are dancing to the music.

- (S/NF/SG/LIMDIS) Source C:

-- The site seemed to be crowded. There were people walking down a narrow "ramp" and they were dressed casually and looked serious. These people were outside and it was warm.

-- There were lots of animals at the site. The animals were outside sitting.

-- There was one area that was isolated and this area had low rolling green hills with several small structures spread apart sitting on the land.

Date: 940606 Monday: 10:30 -- 11:00 Exercise done by [REDACTED] SG11

Location: Lorton Prison Facility, Lorton, VA

Weather: Cloudy, Zero Wind, Visability: Good Temperature: 75 degrees

What we see here is a photograph of the exercise. There is a water tower at 2 oclock a guard tower at 6 oclock, prison barracks from left to right, a 10 foot fence with barb wire and razor blades attached in a circular maner. A guard is in the tower with a shotgun there are prisoners moving in and out of the barrack facilities, cars/trucks are passing behind me on route 123, to the left not shown on this picture is a prisoner on this side of the fence feeding a cat, a Sgt security guard come up in a pick-up truck and asked what Charlie and I were doing there.

C. Rationale for source evaluation. Provide rationale/analysis which led to your evaluation of responses provided above. Include confirmatory/new confirmatory data and whether collection requirements are currently validated/tasked to either obtain or verify such data. Please provide your written evaluation by source.

(S/NF/SG/LIMDIS) Source A:

I do not see any description of this area which may be helpful. Sketch(a) Umbrella may be the guard tower with the guard moving around the tower. Airplane could be landing/taking off from National/Dulles airports.

(S/NF/SG/LIMDIS) Source B:

This target is known for its geological and topographic characteristics as it is the Lorton Federal Prison and I guess a place like that would feel old. The fire tower could be the guard tower which has a ladder to the top for the guard. It would be highly unlikely for people to be dancing to the music here. Sketch B drawing (b) The tall concrete structure may be the tall water tower approx 1 mile away.

(S/NF/SG/LIMDIS) Source C:

Site is crowded. Prison is full of prisoners moving back & forth between buildings. Casually dressed is true of prison dress and a prisoner does look serious and it was a warm day. One prisoner was feeding a cat outside by the fence. It must be noted that there was not a lot of animals in this area. This area is isolated and does have low rolling green hills with several small structures spread apart sitting in different types of confinement locations thru-out the prison complex.

Sketch C drawing (d) Could be the barb wire fence I was looking thru at the guard tower and prison barracks to include the prisoners moving about.
